KNIVES & SCISSORS

Discover our wide range of cutters: from safety blades to precision knives and specific cutting tools, find the cutter that suits your needs.

SPARE BLADES

Stay sharp by refilling your cutting equipment with a wide range of blades, large and small. Ensure you always have quality blades on hand for uninterrupted work and precise, efficient cutting without damaging the glass.

SCRAPING & CLEANING

Prepare the surface of your windows before applying the adhesive with our selection of scraping and cleaning tools. Remove glue, paint and dirt residue with our professional scrapers and cloths.

CUTTING TOOLS

Simplify the cutting of your adhesive with our range of cutting aids. Cut your accurately and with no offsets, for a perfect result.

SQUEEGEES

Get the perfect finish on your adhesive with our range of professional grade squeegees. Our squeegees provide a smooth and even finish by removing air bubbles and excess water.

SMART TOOLS

Great tools for precise and fast installation of adhesive, even in the most complex installations. With our selection of innovative tools, you can apply your adhesive with greater ease and efficiency, for a perfect result.

INSTALLATION TOOLS

A complete range of tools designed to make the installation of adhesive on glass surfaces quick and easy. Professional-grade tools for fast, accurate installations that will save you time on your projects.

HEAT GUNS & MORE

Use thermal tools to control the heating and shaping of your materials. With their thermal controls, our tools allow you to obtain a precise and uniform result. Additionally, their ergonomic design and ease of handling make them comfortable and safe to use for long periods of time.

WORKSHOP GEAR

Our products help you optimise your workspace safely. With our range of workshop equipment, you will benefit from a comfortable, fast and safe installation, for an optimal result.

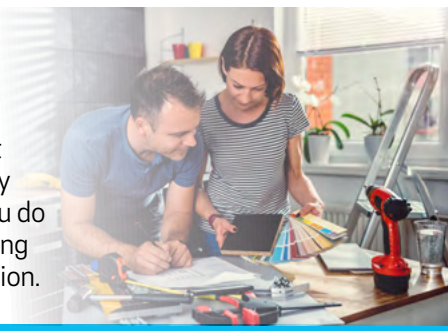

LIQUIDS

Our high-quality products include application fluids to facilitate installation, cleaning solutions to remove impurities and stripping solutions to facilitate the removal of existing adhesive. Use our liquids to keep your jobsite clean

PROMOTIONAL TOOLS

Today's customers often know exactly what they want. But how do you convince your customer that you can offer them the best? That you have exactly what they need? Our support materials will help you do just that. For each specific topic, we have something that can help you with your sales or your presentation.

COVER STYL TOOLS

Get the job done professionally with our range of Cover Styl vinyl preparation and application tools. Our tools have been specifically designed to help you achieve a perfect installation, efficiently. Handle the vinyl easily without the risk of damaging it. Our selection of tools will allow you to attain a seamless result in less time.

QUICK TIPS

Specially for Backing Cutter:

100-023

100-026

Price per unit

- Quick and easy cutting without damaging the substrate
- Fast cutting of from a roll while it's still in the printer or cutting plotter.
- Fast cutting of to size when it's already on the car.

This handy little knife is a 'must have' for every fast fitter. Not only that, this knife can do much more as it was originally intended for the opening and cutting of envelopes, paper, cardboard boxes, etc.

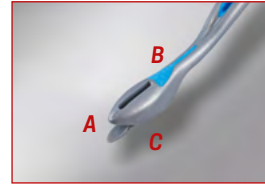

You know the problem: the is on the car - get your knife - blade out - cut the - and then pray you haven't cut in to the paintwork.

There's a much easier and less stressful way. Just take your easy cutter and cut your s to size in one go, without fear of cutting in to the paintwork.

The secret is in the shape and construction of the easy cutter. It has a Plastic head with a flat underside and an angled stainless steel blade mounted on the inside of the head. The runs between the top and underside of the head, so the blade can't possibly come in contact with the substrate.

It's also 100 % safe as the blade is concealed in the head. So having to slide the blade back in before putting the knife in your pocket or tool bag is a thing of the past.

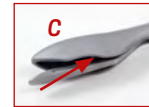

The easy cutter is manufactured from durable plastic with rubber inlays
In short: a simple tool for quickly cutting without a lot of hassle.

There is a 'sight' at the front that allows the cutting line to be followed accurately. Handy and clever.

This ergonomic hand grip with soft rubber inlay ensures a perfect grip allowing effortless cutting of both straight and more intricate cuts.

Built in blade

A knife that DOES NOT cut into the SUBSTRATE

- CUTTING SECURITY S
- CUTTING BANNER MATERIALS
- CUTTING PVC S
- CUTTING WINDOW S
- EASY TO USE AT YOUR PRINTER
- EASY TO USE AT YOUR PLOTTER

QUICK TIPS ATTENTION: the blade cannot be replaced

Price per unit

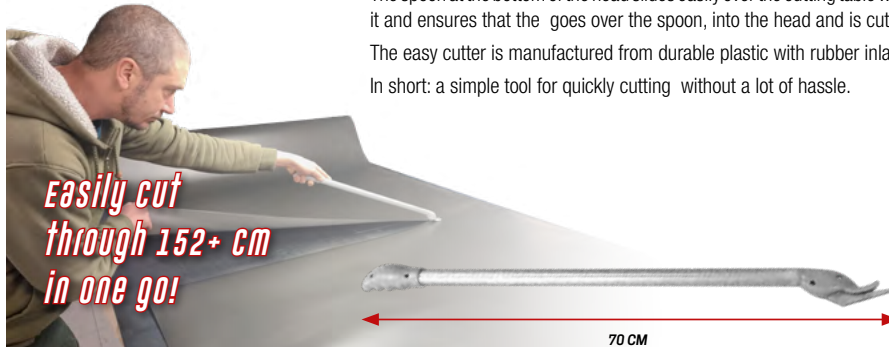

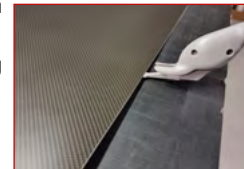

- Super light
- Aluminium handle

Cutting wide 152 cm pieces of on your cutting table in one go? This seems familiar to you?

With the Eez Reach Cutter, this is now a distant memory. The long handle allows you to cut through sheets of or paper as large as 160 cm with one movement. Attached to the handle is a 70 cm long aluminium handle with a smooth head at the front, in which a super-sharp blade is placed.

The spoon at the bottom of the head slides easily over the cutting table without damaging it and ensures that the goes over the spoon, into the head and is cut by the knife.

The easy cutter is manufactured from durable plastic with rubber inlays
In short: a simple tool for quickly cutting without a lot of hassle.

Easily cut through 152+ cm in one go!

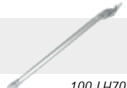

- THE BLADE IS SECURELY POSITIONED IN THE HEAD
- SMOOTH CUTTING HEAD SO THE OR PAPER DOES NOT STICK WHILE CUTTING
- LIGHT ALUMINIUM HANDLE
- THE KNIFE IS REPLACEABLE

QUICK TIPS Recommended knife blades:  100-LH70R

Price per unit

- 10 blades in carton per box

QUICK TIPS Specially for EEZ Reach Cutter:  100-LH70

Price per pack

- Incredible as it may seem, the TS-1 cuts only the top layer!

This OLFA cutter is your top choice when you want to cut only the top sheet. Its unique design lets you cut the top layer while preserving those below. While the cutter is great for cutting coupons and printed articles, you also can use it on cardstock, thin s, plastic sheeting, tape and more.

Good For: cutting a single sheet of paper, newspaper and thin vinyl.

paperworld & creativeworld
Creative Impulse 2012

Spare blade: 120-TSB-1

Price per unit

- Cut only the top or bottom layer with precision
- 6 Depth settings

This handy slitter from NT is ideal for cutting to a specific depth with precision. Cut adhesive without touching the backing paper/supporting material, or, cut the carrier without touching the . It is all possible with this slitter.

The depth is adjustable to 6 different positions. The blade in the plastic housing is made of superhard Tungsten Carbide and provides a perfect cut. The blade is not replaceable.

Price per unit

- Rotary blade inside

The OLFA 100-45-C Maru Rolling Scissors features a rotary blade and a flat bottom for controlled cutting without damaging the surface underneath.

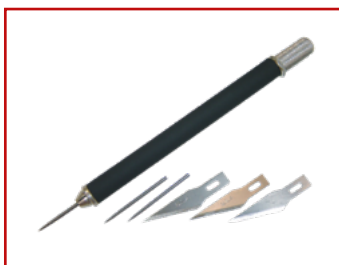

The tungsten tool steel blades can also be quickly and easily replaced at the end of their life. The handle is smooth and lightweight, making using this cutter comfortable and easy.

Spare blade: 120-RB45-1

NT® Cutter Designer Knife **NT Cutter**
EVER NEW & EVER SHARP

100-D400

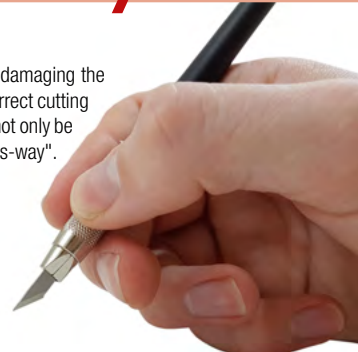

- Perfection in cutting with "the perfect touch"

This knife enables perfect curves and openings to be cut in the without damaging the car paintwork or substrate as it allows more "feel" during cutting as the correct cutting pressure is easier to determine. Fits perfectly in the hand. The blades can not only be placed in the head in the straight, traditional way, but also in the "designers-way".

Place the blade in the rear of the head to create an extremely sharp cutting angle for perfect uniform cuts. This art knife is manufactured from extremely durable plastic with a stainless steel head.

OLFA® 28 mm Perforation Cutter **OLFA**

100-PRC-3/C

- 28 mm serrated blade
- Easy blade change

Perforation cutter from OLFA with a 28 mm serrated blade. Due to the larger (28 mm) diameter of the deeper serrated steel blade, perforations can be cut very easily. Suitable for making folds in cardboard, tear-off strips and serrated edges in paper and foil. The perforation blade is optionally replaceable by a regular 28 mm rotary cutter.

Made of high-quality Japanese tungsten tool steel and designed for unmatched sharpness and superior edge retention. All OLFA knives undergo an advanced manufacturing process where the micro-honed blade provides superior initial sharpness and edge retention, resulting in excellent sharpness and longevity.

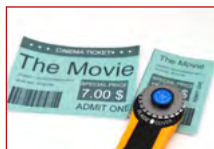

QUICK TIPS

OLFA® EXCEL BLACK™ - Ultra Sharp 12.5 mm **OLFA****120-FWB SERIES**

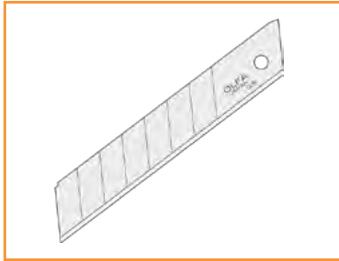

- **Wallpaper cutting blades**
- **Super thin: 0.25 mm**

This OLFA EXCEL BLACK™ 12.5 mm blade is the only blade in the world developed specifically for cutting wallpaper. It has been designed with a unique 65° angle, which was researched to be the ideal angle for cutting paper against a wall, and getting into corners. The ultra thin (0.25 mm) blades will cut even the wettest, pasted wallpaper without dragging or tearing, and more importantly, leave near invisible joints. Splicing two layers of wallpaper is a pain with other blades, but these ones make it effortless, and leave results that impress. The blade has 13 snap segments.

- **SHARPEST POSSIBLE BLADE FOR CUTTING WALLPAPER**
- **ULTRA THIN FOR NEAR INVISIBLE JOINTS**
- **CUTS THROUGH WET, PASTED PAPER WITHOUT DRAGGING OR TEARING**

Lowtack Tack Rags - On a Roll

300-023

- Removes all dust from any surface - Leaves no residue

Slightly adhesive wipe on a roll. Ideal for removing all dust from any surfaces to be worked on. Removes dust from prints before laminating. Removes dust from windows and bodywork prior to application. Removes dust from metal surfaces before painting or spraying. The roll is 30 cm (1'2") wide and each roll consists of individual sheets that can be pulled off as required.

One side is slightly adhesive. Leaves no residue.

QUICK TIPS

Roll length: 36 m (62 sheets)

LowTack tack rags on a roll are the perfect solution for removing dust from a variety of surfaces. Individual perforated sheets.

Price per unit

Tack Cloth Dust - Fix

300-022

- 10 Pack

Slightly sticky cloth. Perfect for removing dirt and dust of window frames, cars or any area which has to be dust and dirt free before applying signs. Will not leave any residue behind. Creates an anti-static surface.

Price per pack

SOTT® Premium Microfiber Cloth - pack 5 pcs **NEW** SOTT

300-029

x5

- Premium Microfiber 40 x 40 cm
- 500gr fine-textured
- 5 pieces in bag

Proper cleaning is essential for assembly. Microfibre cloths are then indispensable. But which one is suitable?

This copper premium microfibre cloth immediately stands out from the competition when held in hand. The cloth's minuscule wavy structure scoops dirt from the surface, as it were, while moisture stays in the cloth. This combination ensures optimal cleaning.

Also, its smaller structure provides more coverage on the surface, so that every mm is cleaned.

QUICK TIPS

40 x 40 cm

Price per pack

LaPal Microfiber Cloth - Eco Sustainable - pack 5 pcs **NEW**

300-045

x5

- Made of recycled material
- 5 Pieces in box

These LaPal microfibre cloths (including packaging) are made of recycled material to reduce environmental impact. Thus, the cardboard packaging contains 5 pieces of microfibre cloths produced from 80% recycled polyester and 20% polyamide.

Not wanting to use unnecessary colour processes, the cloths are neutral white. This is also advantageous to the sign maker, window tinter, car wrapper and ppf installer. As a result, dirt residues are easily visible on the cloth when cleaning.

QUICK TIPS

The LaPal set consists of 5 cloths, each measuring 40 x 40 cm.

Beautifully stitched edges prevent lint

Produced from recycled material

5 pieces in box

Car Dash Cover - 76 x 180 cm **NEW**

300-032

- XXL microfiber cloth

Whether you are installing or removing a window, there is always a massive quantity of water around. Thanks to this XXL microfiber cloth, you can now cover and protect large areas such as dashes, or even in residential areas in which wood finishes would be endangered by water. It's also very useful for car wrapping or ppf installation, where you want to save time on drying the body paint after a quick detailing/cleaning.

Price per unit

QUICK TIPS

76 x 180 cm.

SOTT® Deep Cleaning Clay **NEW** SOTT

300-049

- Kneadable clay for deep cleaning of car paintwork
- For use on car paintwork, glass, hard plastic, mirrors and metals

Anyone who thinks that car paintwork is really clean after washing and degreasing with a good cleaner will be disappointed. Bird droppings, tree sap, tar, road grime and fallout affect the paint and soak into the open structure of the paintwork. Thorough cleaning is then needed. This kneadable clay is made from petroleum resin to which a mild abrasive has been added. This breaks down stubborn dirt, which degreasers and cleaners cannot do.

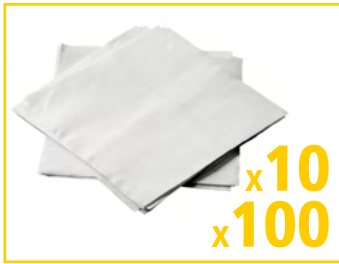

Microscopically, car paint has an open structure in which dirt settles. This cannot be removed with regular agents or even a steam cleaner. SOTT Deep Cleaning CLAY is therefore an indispensable product for non-porous surfaces where self-adhesive must adhere exceptionally well. These include edges, deep indentations and kinks. SOTT Deep Cleaning CLAY is used with water.

QUICK TIPS

Note: the colour of the clay may vary, but does not affect the quality

Price per p/set

- Highly moisture absorbent, dust and lint free; won't tear
- Ideal for cleaning joints and other nooks and crannies.
- Indispensable for fitters and car wrappers

Ultra Clean white polishing cloths, often called surgical cloths, are manufactured from a micro fibre material and are completely lint and dust free. Not one single fibre is released during polishing. This enables the perfect cleaning of any surface. Extremely high moisture absorbency.

The all-round professional

Ultra Clean is so versatile it can truly be called an all-round professional. It can be used for cleaning electrical components, printer heads on industrial printing equipment, cleaning and degreasing windows and windscreens before the application of . Also ideal for cleaning acrylate and rigid foam sheets, as well as for cleaning cars and other vehicles before applying .

Inspection cloth: Ideal!

These cloths are also highly suited for cleaning and degreasing hard to access areas such as in gaps and joints on cars and other vehicles.

The perfect cloth for CLEANING and INSPECTION purposes

FOR CLEANING:

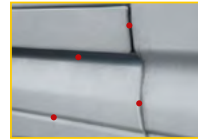

- PRINT HEAD STATIONS
- PRINTER COMPONENTS
- ELECTRICAL COMPONENTS
- ACRYLATE
- RIGID FOAM
- VULNERABLE SURFACES
- BISONYL
- PAINTED AND UN-PAINTED CARS
- GLASS WINDOWS AND FACADES
- DOOR SEALS AND FRAMES
- WINDSCREENS, INCLUDING THE DOT MATRIX

The amount of stubborn dirt that these cloths can still remove from joints, edges and gasps is simply amazing.

Good application is dependent on good adhesion. That goes without saying. Unfortunately, the cleaning and degreasing of the most critical areas get overlooked. These include joints, sills and gaps in bodywork. This is exactly where the tends to come loose and curl.

Experience has taught us that these are critical places that are often overlooked during cleaning. That's just not possible when Ultra Clean cloths are used. If necessary, just wrap a cloth around one of our special squeegees. Apply a little SOTT Surface Cleaner-II (600-SC02) or Industrial Degreaser (600-T800) to the cloth and get in to those nooks and crannies. The cloth will absorb the dirt which will be visible on the cloth itself. Only when the cloth stops absorbing dirt is the surface clean enough for the application of .

Ultra Clean cloths are available in packs of 10 or 100.

Thorough cleaning of any joints or other awkward areas is essential for good adhesion.

Simply take a squeegee and wrap a cloth around it. This will make the cleaning and degreasing of these hard-to-access areas a lot easier.

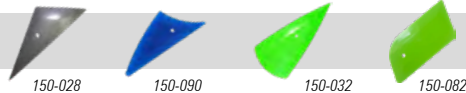

Ultra Clean cloths area ideal for checking to see if you have cleaned and degreased properly. These perfectly white cloths will soon show if any dirt is left in those awkward corners before you start application.

QUICK TIPS

Simply take a squeegee and wrap a cloth around it, this will allow you to clean and check all of those hard to access areas.

Copper Wipes - for Improved Adhesion to the Dot Matrix 3M

300-028

- Soft and fine structure

Special copper wipes for cleaning the dot matrix, often seen around the edge of windcreens. It is often quite difficult to get to adhere between the dots. These copper wipes will polish the raster slightly and this will improve adhesion. Copper wipes should only be used on the dot matrix.

QUICK TIPS

CAUTION: NOT useable on tempered glass

Price per unit

Cleaning Sponge For Textured Surfaces - Absorbs Dirt 3M

300-044

- Extracts dirt from the pores
- Perfect for matte car wrap s
- Perfect for textured interior s

This special white sponge, in combination with our Car Wrap Cleaner 600-CC44 cleaning spray is the perfect solution for cleaning matte self adhesive s like car wrap * (especially matt). The sponge extracts all dirt released from imperfections in the , returning it to its original colour. Rinse the with water and job done!

NB: these sponges should not be compared with other conventional sponges as they are more susceptible to wear and tear. Copper wipes should only be used on the dot matrix.

QUICK TIPS

For best result, use:

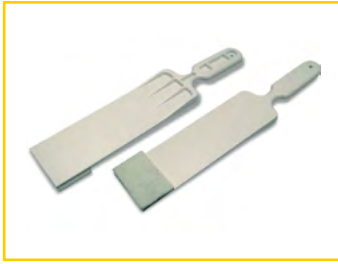

600-CC44

*A detailed explanation of this process is included in Car Wrap Cleaner product 600-CC44.

Price per pack

The Scrubber Scouring Pad Squeegee

300-035

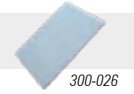

Before is applied the glass should be clean, degreased, and any hard specks of dust or dirt should be removed. However, it's not always easy to get to every part of the window. Perhaps the window is just too big, or perhaps you can't get behind a radiator or a cabinet, etc.

It's now a piece of cake! Just attach a scouring pad (see 300-026) to the Velcro on the SCRUBBER and use where necessary. The SCRUBBER is made of sturdy plastic allowing a good deal of pressure to be applied during cleaning.

Use on this squeegee:

The SCRUBBER is equipped with a strip of Velcro allowing the simple attachment of a scouring pad.

Price per unit

Cleaning Squeegee

150-113

- For proper cleaning of the edges of window frames.
- 10 cm

Special squeegee for cleaning the edges of the glass at the window frame. The rubber is stiffer than ordinary squeegees and therefore the dirt can be pushed away better with the water.

OLFA® 120 mm Glass Scraper **OLFA**

300-GSR-1/3B

- 12 cm Wide

- Extra flat for better cleaning

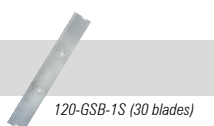

OLFA's special scraper makes it easy to remove paint, glue residue, stickers, glass paint and all kinds of dirt from glass surfaces. The thin design of the 300-GSR-1 allows it to go very low and flat over the glass. Ideal for use on wet surfaces, as the blade, mounting plate and screw are stainless steel. The blade is 0.25mm thick and ground on both sides.

By loosening the fixing screw and moving the metal plate, the worn blade can be easily removed. The cover of the blade can be slid onto the handle, giving you even more grip while scraping.

Soak It Up - Tint Rope 3m

NEW

300-031

- Absorbs 4 times its own weight in water
- Does not lint

Indispensable when tinting car windows. To prevent water from running into seams and cracks, this moisture-absorbing braided rope is the way to go. Place the rope between the window and the rear shelf, between the door panels or between the dashboard and the windscreen. Water running down from the glass will be sucked up by the rope.

After the job is done, wring it out, let it dry and it's ready for another use.

The cover foil is 55 cm high; ideal for dashboards, parcel shelves, door panels, etc. Roll length 33 m

Soft without damaging the glass.
Strong water absorption.
Convenient storage.

Price per unit

Soft Surface Scraper Mini *SCRAPERITE*

300-006

- New type of holder for better grip
- 6 Scrapers included

Removing adhesive residue and hard bits of dirt from surfaces can be a problem. Scouring pads, blades and metal scrapers can cause scratches. That is why Scrapperite's orange scrapers are a godsend. This small plastic holder has an orange polycarbonate razorblade and does not scratch.

You can use it on car paint, acrylic, hard foam, wood, glass, etc. A handy and indispensable scraper for every mechanic and should actually be available in every Tool Bag, Tool Box and Tool Station. In this way you can be sure that the cleaning, removal and scrubbing is done properly and without problems. Separate scrapers are also available.

The scraper has a sharp edge on both sides so that, for example, glue residue can be scraped up very easily. TIP: scrape it to one heap and scoop it onto your cleaning cloth. Repeat this procedure until all glue residues are gone.

RENEWED, THOUGHT OUT AND UNMATCHED

**ADHESIVE and DIRT removal
without causing any damage**

Scraperite is an American company that specializes in the removal of hand dirt, glue residue, hard obstacles, etc. from fragile and delicate surfaces. The blades are made of a special plastic mix and come in different sizes and shapes, so that an optimal result can be achieved without damaging the surface.

PERFECT FOR WINDOW INSTALLERS, CAR WRAPPERS, INTERIOR INSTALLERS, ADVERTISING AGENCIES, ETC.

Scraperite ORANGE:

The Scraperite ORANGE is manufactured the softest material we offer and is a perfect tool for use on delicate surfaces. The orange version is made from Celcon and is approved by Boeing for use on Alclad aluminum airframes. Works great on painted and delicate surfaces.

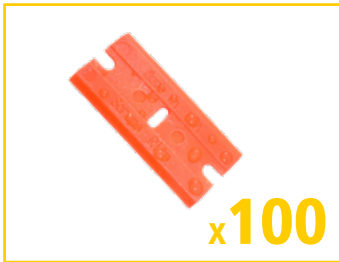

Scraperite BLACK:

The scraperite BLACK is harder and intended for heavy-duty cleaning. This new, harder material is more resistant to breakage and wear. Designed for use in industrial applications where repeated use is normal. It also does a better job with more stubborn adhesives, sealants, oxidation, corrosion, etc. on less sensitive surfaces.

QUICK TIPS

Instructions for use:

Use the adapter for mounting it on a drill. Set drill to the right speed (rpm). Exert light pressure and move the disk back and forth whilst erasing. Any remaining adhesive residue or deposits can be polished away with SOTT 600-Z0415 Right-Off Adhesive Remover or 600-T800 Industrial Degreaser. Test on a small area before you start erasing large areas.

CUTTING TOOLS

Simplify the cutting of your adhesive with our range of cutting aids. Cut your media accurately and with no offsets, for a result that is synonymous with perfection.

SOTT

The Ultimate Cutting Ruler

Protects Your Fingers

Won't Slip During Cutting

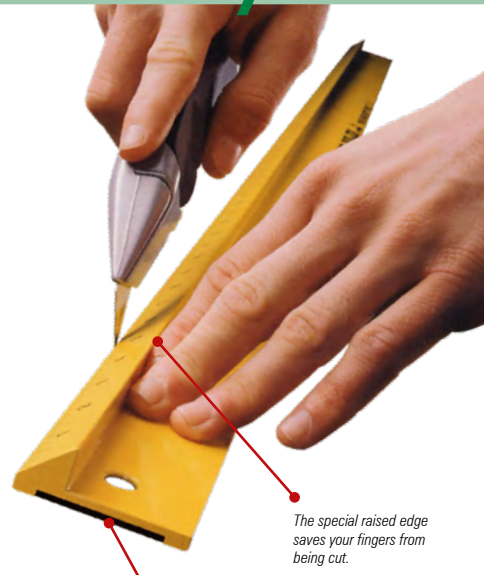

Aluminium Cast Body

Anti-slip cutting ruler, indispensable for signmakers, window tint installers and interior installers, that need to cut straight lines without the cutting ruler sliding all over the place.

A unique solid aluminium cutting ruler with all of the advantages that you could possibly wish for: strong, stable, straight, but above all safe. This allows you to make long cuts with ease, without the fear of the knife 'jumping' and running across your fingers. The workshop becomes safer and production is increased. Large sheets of and thick, rigid materials can now be cut with ease.

The cutting ruler that CAN'T SLIP during cutting

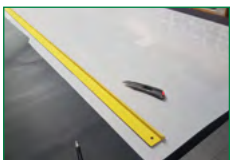

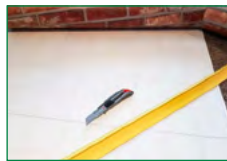

The special raised edge saves your fingers from being cut.

The thick anti-slip layer not only prevents slipping, but also protects your work from damage.

Aluminium cutting ruler with raised edge to protect fingers

The calibrations are clearly displayed in centimetres. This allows cuts to be made straight to size. The special antislipunderside ensures perfect stability on every surface, be it glass,acrylate, card, linoleum, rubber or anything else for that matter; the ruler remains perfectly still during cutting. The ideal tool for large colour prints and the like. The anti-slip foam layer prevents the ruler from coming in to contact with your work preventing it from damage when the ruler is slid around. Very handy!

- CUTS SELF ADHESIVE S
- CUTS POLYESTER WINDOW S
- CUTS PLASTIC PANELS AND FOAM BOARDS
- MAKE SUPER STRAIGHT LINES

Available in 4 different lengths:

250-CB50	50 cm	Price per unit

Price per unit

- Define cutting lines before install PPF
- Create a flexible ruler for cutting purposes

This 6mm (.25") plastic tape is a revelation for every installer. Easy to stretch and shape, does not leave adhesive residue.

Quite thick, so doesn't tear or break easily. Cutting and Contour Tape is ideal for:

Establish cutting lines:

If needs to be cut to follow a desired form then Cutting and Contour Tape is the ideal solution. First apply the , use the tape to create the desired form, and then simply cut carefully along the tape. The red and blue panel shown on the photo can be cut entirely freehand. The top of the full colour print that runs away slightly at the top can also be cut perfectly using the Cutting and Contour Tape.:

PPF bulk installation with cutting tape

Use this tape to place the correct cutting lines. Then install the PPF as you normally would. Now cut through the ppf , and on top of the cutting tape. Pull the cutting tape from under the ppf while spraying water under the . Result: nice cut and the paint is not touched.

3M Knifeless Tape™

NO KNIFE. NO DAMAGE. NO WORRIES.

Removable Cutting tape that Easily CUT

Special removable tape with embedded cutting wire. Perfect tool to make clean cuts through digital prints, laminated s, car wraps, carbon- and other structured s when bonded to cars or other surfaces. Not suitable for stone chip resistant PU s.

3M® Knifeless Tape Finish Line 3M

350-206

Rotates easily in any direction with contours, curves and edges of the car. Accurately and efficiently cuts through selfadhesive without the use of a knife and without surface damage, resulting in perfectly straight, smooth lines or curves.

- **CUTS MOST VINYL WRAP S.**
- **FOR APPLICATIONS WITH ONE OR MORE VINYL LAYERS**

Price per roll

3M® Knifeless Tape Bridge Line 3M

350-207

This type of tape is wider and can therefore adhere to both sides of the body parts. This avoids the risk of cutting into the underlying rubbers, for example, or of the cut not being exactly in the middle.

- **FOR CUTTING AT DOORS AND SEAMS**
- **FOR CUTTING LAMINATED PERFORATED WINDOW S**
- **FOR APPLICATIONS WITH ONE OR MORE VINYL LAYERS**

Price per roll

3M® Knifeless Tape Design Line 3M

350-208

Allows stretching, follows contours and turns easily in any direction. Excellent for creating designs & stripes with no extra steps required to achieve a perfect cut.

- **STRETCHES SLIGHTLY AND TURNS EASILY IN ANY DIRECTION**
- **BEST OPTION FOR VERY TIGHT CURVES.**
- **TAPE CAN BE TORN BY HAND FOR FASTER APPLICATION.**
- **FOR SINGLE LAYER VINYL APPLICATIONS.**

Price per roll

3M® Knifeless Tape Perf Line 3M

350-209

Easily cut an even margin between window graphics and window rubber.

- **USED FOR CUTTING LAMINATED PERFORATED WINDOW S (ONE-WAY VISION) AND CREATING A UNIFORM RELIEF CUT ALONG RUBBER MOLDS BEFORE APPLYING EDGE SEALING TAPE.**

Price per roll

3M® Knifeless Tape Precision Line 3M

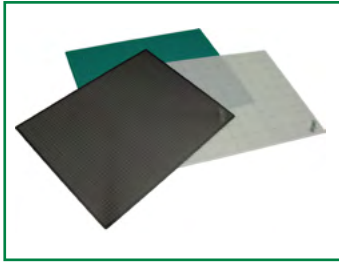

350-213

Accurately and efficiently cut through self-adhesive without using a knife or damaging the surface, resulting in perfectly straight, smooth lines or curves.

- **CREATE A TIGHT, INVISIBLE SEAM BETWEEN TWO DIFFICULT TO WORK WITH S.**

Price per roll

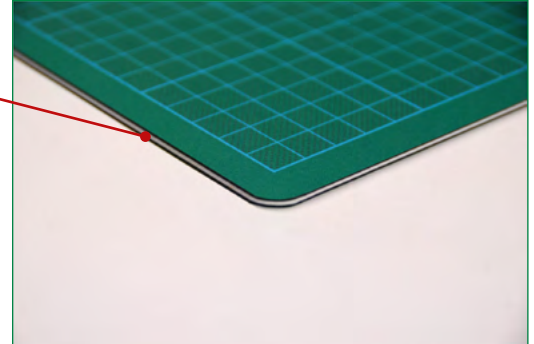

- 3 mm (120 mil) thick double layer calibrated cutting mat
- Available in black, green and transparent

High quality cutting mat which closes after every cut, preventing your knife from following previous cuts. These mats are triple layer enabling both sides to be used.

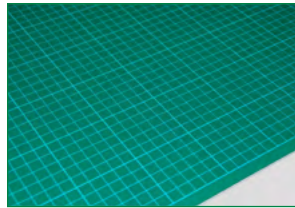

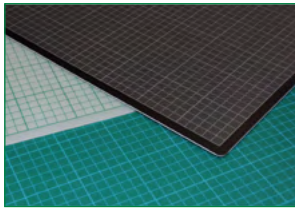

So they'll last twice as long!

Makes that perfect cutting table

The mat has a solid core which ensures that it remains flat on the table without curling.

The calibrations on the upper side allow the accurate positioning of the or cutting ruler.

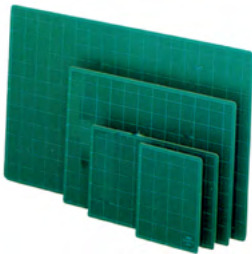

Handy tip: Use a number of smaller mats on a large table - e.g. 2 x 3 (60x90) instead of one large mat. Experience has taught us that some areas of a table are used more often than others, so the mats wear out quicker in some places than others.

If you follow this advice you should only have to replace a single small mat instead of the whole table area. Simply attach the mat to the table with double sided tape. Never place warm or hot things (e.g. cups of coffee) on the cutting mat. This will cause permanent surface damage to the mat.

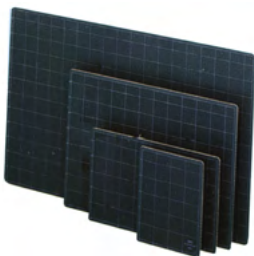

Cutting tracks are eliminated ensuring every cut is perfect. Even cutting in the finest detail is possible.

The Edge - Finisher ^{NEW}

- Clever mini rulers for perfect edge finishing

Skillfully marking, cutting and finishing edges and corners is not always an easy task. Especially when all edges and corners have to be uniform. With these clever guides, this is a piece of cake. Place the mini ruler in the desired corner or edge and make exactly parallel cuts or markings.

Perfect for measuring and cutting

Marking off with precision

This is handy: there is a 5 mm gauge on the flat strip and a hole every 5 mm. Place your pencil or marker there and then, draw a perfectly parallel mark.

Cutting perfectly parallel and straight

Next to the holes are slots to insert your knife. Now easily cut each straight and parallel in a single movement.

Teflon Squeegee Tape - Super Smooth 5 m ^{NEW}

500-047

- 25 mm x 5 m
- PTFE coated fibreglass

Do you want your squeegee or backing slitter to glide beautifully and smoothly over? Then, the Teflon Squeegee Tape is just what you need.

Simply stick it on any surface and you're done. Also ideal for reducing friction on rods, guides and strips. Heat resistant. Does not absorb moisture. Roll length: 5 m

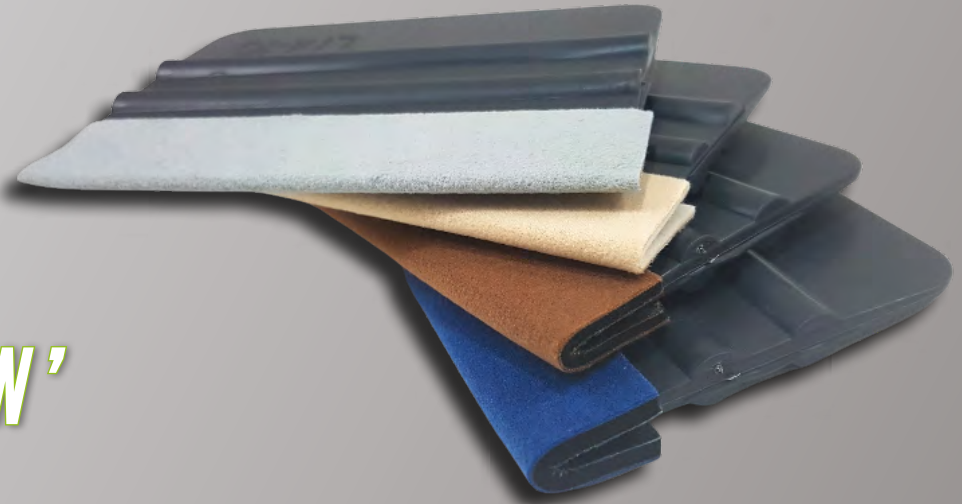

QUICK TIPS

Just cut off what you need and stick it on your squeegee, backing slitter or whatever.

Price per unit

KEEPIN' IT SCRATCH-FREE AND SHINY

Wrapping pros all over the world use them: felt tips or sleeves that help your squeegee slide smoothly, called »buffers». But what is a good solution when installing high gloss s? And what about chrome and mirror s? Scratches do happen. SOTT has the solution: the WrapEdge, made of soft, structureless alcantara. Available in 4 types. These »buffers» do exactly what every installer and wrapper wants, because each type of WrapEdge has a preferred application.

HIGH GLOSS PVC

Many installers have experienced that squeegeeing high gloss s (especially dark colours) causes scratches.

WrapEdge helps to avoid that! Because the middle layer absorbs and retains moisture, you can wet it with some soapy water and presto! the world's best squeegee is a fact.

Your squeegee suddenly slides perfectly over the vinyl while the pressure is evenly distributed and the is superbly applied with no issues whatsoever.

MIRROR S?

Chrome, polyester or mirrored - they all have one thing in common: they easily scratch when you install them.

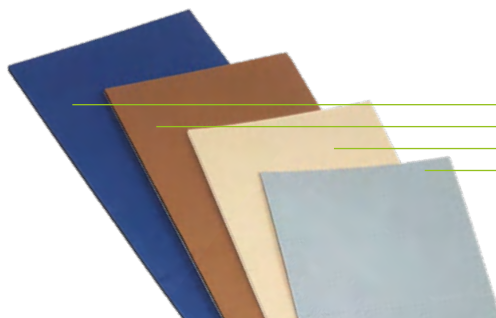

Wouldn't it be nice if you could simply squeegee them down and not have to worry about scratching?

VARIOUS THICKNESSES

The WrapEdge buffers have a sponge middle layer that serves 3 functions:

- 1: It holds moisture so it can contain the soapy water for wet squeegeeing.
- 2: Wet installing of window becomes a breeze, because the sponge layer absorbs the squeezed-out moisture at the edge.
- 3: The thickness of this layer ensures an even pressure distribution when squeegeeing and flawlessly follows the channels and other recesses of the vehicle body parts when the is pushed in.

WrapEdge

The WrapEdge buffers are available in 4 different types, each one for a specific application. Check the back for more information.

The 4 different WrapEdge buffers are all made of high-quality, structure-free alcantara. The difference mainly lies in the moisture-absorbing middle layers, which perfectly serve as a moisture reservoir to prevent scratching when wet squeegeeing. The thicknesses differ from type to type. The special adhesive on the back is moisture-resistant

Thin and strong alcantara. Spreads the squeegeeing pressure evenly. Can be moistened for an even better result. Contains no sponge layer.

The buffers are slightly larger than a standard squeegee, so the squeegee edges don't scratch.

Available on a roll 2 cm x 2 mtr.

WrapEdge 00

Sturdy alcantara with a 1 mm sponge layer. Spreads the squeegeeing pressure ideally. Extremely suitable for chrome, high gloss, and polyester s.

The added 1 mm sponge layer makes the squeegee's edge rounder and distributes the pressure over its full width. If necessary, wet the buffer to prevent scratches.

Available in sets of 12, pre-cut in 2 sheets.

WrapEdge 01

Sturdy alcantara with a 2 mm sponge layer. Spreads the squeegeeing pressure ideally. Extremely suitable for chrome, high gloss, and polyester s.

The added 2 mm sponge layer makes the squeegee edge thicker and rounder and distributes the pressure over its full width. If necessary, wet the buffer to prevent scratches.

Available in sets of 12, pre-cut in 2 sheets.

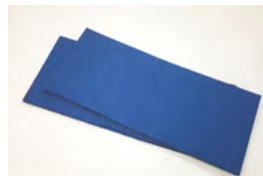

WrapEdge 03

Sturdy alcantara with a 3 mm sponge layer. Perfect for wrapping in recesses and over swages as it can easily form the in and over those areas.

The rounded edge of the squeegee is made thicker and is therefore very suitable for channels in company cars and vans. If necessary, wet the buffer to prevent scratches.

Available in sets of 12, pre-cut in 2 sheets.

Designed by Jacob Berg (NL)

- HANDLE FOR ALL TYPE OF TURBO SQUEEGEES
- 11 CM WIDE
- ALL FINGERS FREE FOR USE
- CREATES MORE POWER

Generate mega-power on your squeegee

WIN every BATTLE with window

Turbo squeegees are known worldwide. Every window tinter uses them. But how do you put a lot of power on this squeegee? With the special handle called The Knuckle, this is no longer a problem.

Made of super-strong plastic, The Knuckle is shaped like a boxing stirrup and fits perfectly in the hand. Maximum power is hence guaranteed. Simply slide a turborakel into the clamp on the front and The Knuckle is ready for use."

Do anything with the Knuckle in your hand.

The great thing is that you don't have to put The Knuckle aside to free up your hands to pick something up. While you have The Knuckle in your hand, you can also pick up window, peel off the protective sheet, spray the, place the, position it and then start squeegeeing with this Knuckle! All this while you still just had it in your hand. Bizarre but true. You just place your fingers through the eyes of the handle, and you have your hand free for use.

Choose which turbo squeegee you want to use in The Knuckle.

Slide a turbo squeegee into the slot.

Firm grip due to the shape of a punching bag.

The Hustler: The Ultimate 4 in 1 Squeegee SOTT

150-090

- **Cleverly designed shape to reach everywhere**
- **A 4 in 1 squeegee**

This cleverly shaped squeegee is a must for any installer. The different sides make it extremely practical to do various jobs with it. What can you do with this squeegee?.

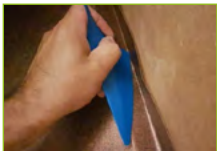

The Hustler

**THE 4 IN 1 TOOL FOR EVERY WRAPPER,
INTERIOR INSTALLER & WINDOW TINTER**

QUICK TIPS

1. You can easily push wrap under rubbers of window frames or around roof racks without damaging the .
2. Also perfect for use as a cleaning tool. Wrap a cloth around the squeegee and use it to easily get into any small narrow place that area. It can also be used as a cutting guide squeegee for window frames.
3. After the window is installed, place the squeegee on the , at the top of the corner and against the rubbers of the window frame. Put your knife against the squeegee and slide both down in one movement. Result is a perfect straight cut.
4. Because the squeegee is smooth and solid, it is also good to use when installing rigid s such as interior s. You can use the rounded side of the Hustler to guide and turn the in a sharp corner without damaging the .

Price per unit

The Green Wing SOTT

150-082

- **Medium soft teflon, perfect for smooth squeegeeing**
- **Special angles and shapes**

The Green Wing is an indispensable squeegee for any professional installer. The squeegee is made of medium soft Teflon and is pliable so it can be used on both flat, convex and concave surfaces. Due to the four different edges and angles, it is possible to get any type of self-adhesive pushed into the most difficult places. The edges are not sharp so the will not be damaged.

Automotive window use:

This squeegee was actually developed to make it easier to push window in cars behind the door strip and squeegee the moisture there. Thanks to the thin design and round shape, this is easy to do without damaging the window .

Flat glass window use:

Use the GREEN WING as a cutting guide squeegee for window frames. After the window is installed, place the squeegee on the , at the top of the corner and against the rubbers of the window frame. Put your knife against the squeegee and slide both down in one movement. Result is a perfect straight cut.

Prepping car for wrap
Use the GREEN WING as a cleaning squeegee. Put your cleaning cloth around the squeegee and you can clean and degrease any small corner, kink or edge.

Little Willies - Set of 5 SOTT **NEW**

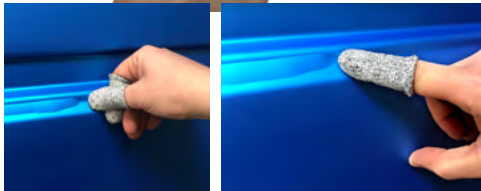

The replacement for the wrap glove

- Set of 5 pieces
- Ideal for pressing and guiding in trenches
- Prevents cutting your fingers
- Cut resistance level 5

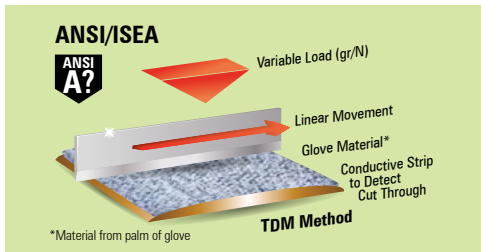

An alternative to a complete wrap glove.

"Wrapping gloves are now fully established. But why should the WHOLE hand be covered with fabric if you often only use your fingers to push the into the channels and kinks? Also: using a glove to grip the 's adhesive layer is not always wise; fibers and dust can stick to the adhesive layer from the glove. And we don't want that.

Simply place the Little Willies on just a few fingers. Use these fingers to press on the and the other to grip the and adhesive layer. Pretty as it can be. Comes in one size; elastic fabric

Stick, wrap, install and cut without getting injured. This is possible with the Little Willies from SOTT as they are made of cut-resistant fabric and therefore meet the ASTM/ANSI test: Cut Level 5. So a quick cut on your fingers is not an option.

- Meets the ASTM/ANSI test: Cut level 5
- Smooth and tightly woven
- Set of 1 pair

Every installer knows the problem: accidentally cutting your hand or fingers. When large sheets of , cardboard or plastic panels have to be cut, there is a risk of accidentally cutting your fingers. This can be avoided using the ANTI-CUT Glove. This glove is woven with a smooth fibre that prevents sharp objects from passing through it.

Another ideal application is to use when deforming window on car windows. With its dense and smooth texture, the glove helps, positions and rubs away creases during heat-shrinking.

The Factotum II **SOTT**

- The solution for small corners, holes, seams and cracks
- Unbreakable material

Every mechanic knows it: mounting self-adhesive in places that are hard to reach. The Factotum-II is a handy mini oval with two usable sides. It guides every in the smallest corner or kink, without destroying the while pressing. The smooth rounded corners give you the perfect opportunity to guide the to where you want it.

Medium stiff and unbreakable.

For installing window :

Easily install your window between window rubbers, door frames, or in a corner between the rear shelf by using the Factotum-II to direct the to your desired location.

For installing interior :

Mounting these s is a precise job. Every edge, seam and kink has to be perfect. Especially in corners and around small objects it is nice when you can finish and press the edges with precision tools. This is what the Factotum-II is for.

For installing wrapping :

Installing wrapping between headlights, window frames, door handles and taillights is precision work. Small tools are a godsend. The Factotum-II gives you the possibility to guide the in the corner and press it on places you normally cannot reach.

Price per unit

EZ Reach ULa Platinum - Medium

150-070

The platinum version offers a hard card texture with internal lubrication technology that helps prevent point-of-contact scratching.

Price per unit

EZ Reach ULa Gold - Soft

150-071

The EZ Reach Ultra gold version has a flex-firm rating that works wonders.

Price per unit

EZ Wing Lime - Soft

150-074

Super soft and flexible but stiff in the middle. The EZ Wing has a slightly curved main edge. The curved edge is designed to enable the tool to encourage a finger or bubble to disperse outward, which reduces the likelihood of a crease.

Price per unit

Gold EZ Squeegee

150-029

- **Medium hard**

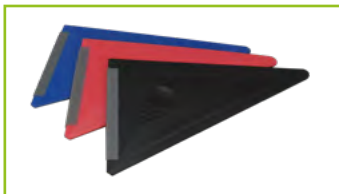

Smooth and flexible squeegee, perfect for applying carwrap and automotive window in hard to reach areas and corners. Medium hardness.

Price per unit

Triangle Reach Squeegee set of 3

150-096

- **3 different hardnesses**
- **Rubber strip on the short side**

Interesting and super handy. This set of three squeegees is an ideal solution for every car window installer. The squeegees have different edges and therefore different functions. For example, the round tip is great for guiding window around difficult corners and between tight-fitting rubbers or strips.

The short side has a rubber strip, which provides excellent pressure to repel moisture under the . The shortened squeegee tip prevents the from tearing at corners during squeegeeing. Set of 3 types

Price per set

Platinum Silver EZ Squeegee

150-028

- **Soft**

Same product as above but softer.

Price per unit

Teflon Yellow Squeegee

150-027

Very soft and flexible Yellow Teflon squeegee. Perfect for use on large, curved windshields thanks to its 15 cm width. Won't scratch glass.

Price per unit

Diamond Tip Yellow

150-030

An essential tool for applying vinyl in hard to reach areas, because of the special design and sharp edges of this squeegee. Won't scratch glass

Price per unit

Hau Tool Black Squeegee - Medium Hard

150-084

Black plastic squeegee in parallelogram shape of German manufacture. This black version forms itself nicely to the shape of the surface while maintaining good pressure on the edge. Good to use as a squeegee for small narrow corners and slots but also for large surfaces. Does not scratch window s. The squeegee edges are 15 and 8 cm.

The light structure of the blade prevents it from slipping out of your hand when you work with moisture. The does not stick to the squeegee either.

The red version 150-085 is a bit softer and more flexible.

Price per unit

Hau Tool Red Squeegee - Medium Soft

150-085

Red plastic squeegee in parallelogram shape of German manufacture. This red version is a bit softer than the black version and therefore it follows the shape of curved surfaces just a little bit easier. It can be used as a squeegee for small, narrow corners and slits as well as for large surfaces. Does not scratch window s. The squeegee edges are 15 and 8 cm. The light structure of the blade prevents it from slipping out of your hand when you work with moisture. The does not stick to the squeegee either.

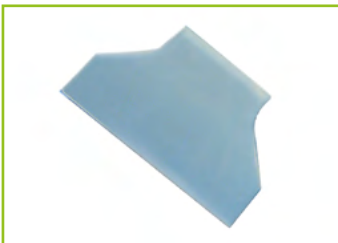

The black version 150-084 is slightly stiffer.

Price per unit

The Plow

150-011

Flexible squeegee for curved surfaces, such as windshields. Adapts itself to each surface.

Price per unit

The Red Devil

150-013

Very thin (1 mm!) and flexible squeegee for positioning and applying window on side windows and for reaching sharply angled corners.

Price per unit

Grip-N-Glide Orange - Soft

150-068

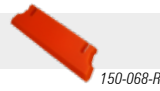

- For paint protection, vinyl graphics and car wrap s

The Grip-n-Glide features a sturdy construction with interchangeable blades. The blades conveniently and securely snap in and out of the uniquely shaped ergonomic body. The body is then covered in an ultra-comfortable handgrip that has a deep surface texture making this squeegee easy to use in wet or dry environments.

- For window installation

The Grip-n-Glide features a sturdy construction with interchangeable blades. The blades conveniently and securely snap in and out of the uniquely shaped ergonomic body. The body is then covered in an ultra-comfortable handgrip that has a deep surface texture making this squeegee easy to use in wet or dry environments.

Replacement blade:

150-069-R

Price per unit

Power Stroke - 15 cm

150-005

- Flexible

An original handheld molded Squeegee, ergonomical designed to fit comfortably in your hand. It measures 15 cm from tip to tip, with a ridged grip area that fits your hand perfectly to reduce fatigue.

Price per unit

Little Foot Blue - Soft

150-072

- Soft

The Little Foot Blue fits comfortably in your hand, and features an angled, long-reach tip that gets behind gaskets and rubber seals quickly and easily. Measuring about 15 cm along the usable edge, Little Foot's pointed tip lets you squeegee in tight spaces while keeping a firm grip on the tool.

Price per unit

Little Foot Red - Medium

150-073

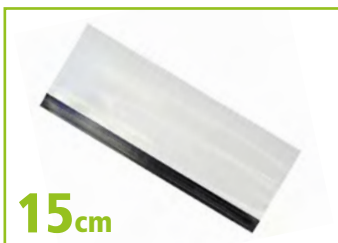

- Medium firm

The Little Foot Red fits comfortably in your hand, and features an angled, long-reach tip that gets behind gaskets and rubber seals quickly and easily. Measuring about 15 cm along the usable edge, Little Foot's pointed tip lets you squeegee in tight spaces while keeping a firm grip on the tool.

Price per unit

Black Edge Squeegee

150-019

- Medium firm

This flat rigid plastic squeegee has a black rubber medium hard blade to pull moisture out from under window s. The white body is thin but ergonomically shaped, so your fingers have enough grip to apply force.

Price per unit

The Slammer

150-010

Stiff, smooth plastic squeegee for automotive windows. This squeegee has been specially designed to deal with hard-to-reach areas, such as the glass surface under the rubber rim. The sturdy handle allows for a good grip. Won't scratch the window.

Price per unit

The Edge

400-003

Stiff and smooth big squeegee to push back the rubbers in the door of cars. Makes tinting the windows of cars under the rubbers much easier.

Price per unit

Tail Fin Green - Soft

150-022

- Designed for installation behind brake lights - soft and flexible
- Softer than the yellow version

You know the problem: that third brake light at the bottom-center of the back window. This special tool is designed to make installing window around the third brake light easier. It pushes out moisture -and keeps it out with pressure that holds down the edges behind that bothersome third brake light. It has an arched, curved body that gets behind the brake light to apply the constant pressure required to keep moisture from seeping back, thus allowing the adhesive to grab. Designed with two holes in the body of the tool for a better grip.

Price per unit

Tail Fin Green - Soft

150-023

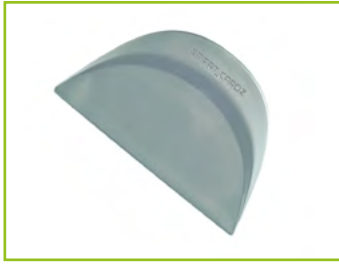

- Designed for installation behind brake lights - soft and flexible
- Stiffer than the green version

You know the problem: that third brake light at the bottom-center of the back window. This special tool is designed to make installing window around the third brake light easier. It pushes out moisture -and keeps it out with pressure that holds down the edges behind that bothersome third brake light. It has an arched, curved body that gets behind the brake light to apply the constant pressure required to keep moisture from seeping back, thus allowing the adhesive to grab. Yellow Reach Wing 43 cm *NEW*

150-083

- Especially for hard-to-reach areas
- Tough, flexible and unbreakable

We have all known the frustration of hidden spots or restricted areas where you could hardly squeegee the water out. The Yellow Reach Wing is a squeegee designed especially for window , to apply the best possible pressure in small hard-to-reach areas. The slightly curved shape makes the squeegee sturdy and stable for applying pressure.

There are ridges on the bottom for better grip when the squeegee is wet. The grey rubber edges allow moisture under the window to escape."

Price per unit

The Conquistador

150-008

Specially designed squeegee for the installation of window in hard to reach areas. It's ergonomic design is perfect for applying in tight & sharp angled corners.

Price per unit

The Conquerer - The Original One

150-008S

Nothing beats the original Conquerer. This squeegee is the favorite per excellence with experienced car tinters because it is the tool of choice to mount window nicely in the dot matrix (grids).

QUICK TIPS

What is the difference with the other versions?
The rubber strip on the squeegee does not melt at high temperatures.

Price per unit

The Titan

150-046

- Ultimate versatility

This special squeegee solves the two main problems experienced during the application of window on to convex rear windshields and side windows.

1. Its long, sturdy but flexible form makes it the perfect squeegee for applying to very deep and low-lying rear windshields.

2. The profile variations at the back of the squeegee allows it to work the window in to corners and between the window seals in a number of different ways. Manufactured from sturdy, flexible and unbreakable plastic.

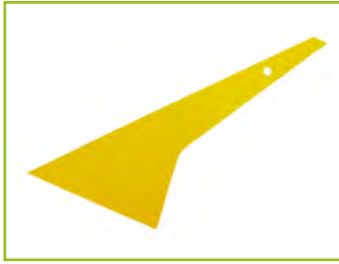

QUICK TIPS

Size: 38 cm x 8 cm

Price per unit

The Yellow Quickfoot

150-026

- Medium hard

Stiff, smooth plastic squeegee for applying automotive window s in hard to reach areas. This squeegee fits into a variety of differently angled corners, and its long narrow end is perfect for pushing back rubbers.

Price per unit

Quickfoot Blue - Soft

150-180

- Flexible

When you need a stiff squeegee with a handle for jobs that require medium reach, Quick Foot is the perfect »in-between« tool. Quick Foot is slim and trim like Slim Foot, but has a shorter, unwrapped handle so it fits more easily in your tool apron. This economically priced hybrid gives you a range of flex rating options to meet a variety of applications.

Price per unit

The Slimfoot

150-170

- Squeegee for hard to reach areas - 36 cm long - 15 cm wide

THE SLIMFOOT: Special thin, long squeegee, for example for use with flat rear windows, when squeezing is difficult.

Price per unit

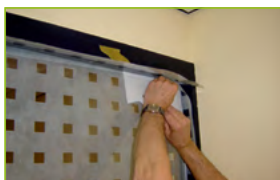

5 - Way Tool

150-035

Helper for holding window adhesive taut on windows at edges and corners during cutting. This grey version is made of soft pliable plastic and has rounded corners, so that the window will not damage when slid or placed in a corner.

These are the 5 possibilities of using the 5-way tool:

A rounded short bevel that allows foil to be carefully pushed into a difficult corner.

A short bevel with a 10 cm long straight edge that enables this side to be so used as a regular squeegee.

A 90° angle, where the can be cut directly on both edges.

A 26 cm straight edge that can be used as a cutting ruler and guide.

A large diagonal angle (80°), so that one side can already be cut while on the other side the may still need to be squeegeed to the edge.

Price per unit

Go Doctor Red - Soft

150-060

- Soft

The Go Doctor Red window squeegee features an "i-beam" handle construction which fits comfortably in your hand. The design provides greater efficiency and less fatigue. This Red Go Doctor blade is the softest of the three blades and is perfect for thinner window s and paint protection s.

The Side Swiper - 15 cm

150-063

- 1 Optimal pressure on the tip
- Ideal for difficult to reach places

The SIDE SWIPER is a unique squeegee designed for installing window s in difficult to reach places. Thanks to its special shape it has many advantages. Handle: This makes it easier to get your hand and squeegee into narrow and difficult places, such as sloping car rear windows. Your hand lies further behind the squeegee, which extends your reach.

Body: the body of the squeegee is made of sturdy plastic and allows you to apply force. The body is completely rounded and gets smaller to the tip, so it cannot damage the . Rubber strip: the (replaceable) strip works like a squeegee and because of the considerable force you can put on the tip, it is very easy to push away all the remaining moisture at that spot.

Price per unit

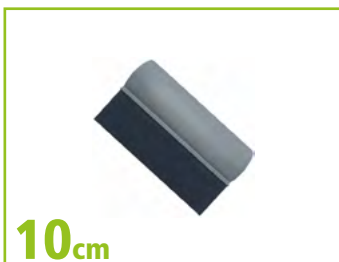

BIG TURBO squeegees

With a larger diameter and black rubber strip, the Big Turbo is an ideal squeegee for quick installations of windows on glass in buildings. The larger tube lies better and firmer in your hand so that you can apply more force without in, or tiring your wrists. In short: a good addition to your toolbox.

Large diameter handle: 4 cm
Better grip in your hand so less fatigue while squeezing.

Big Mini Turbo Squeegee - 10 cm

150-113

- Width: 10 cm

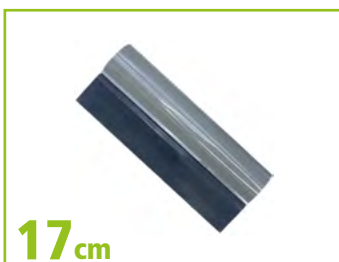

This Big Turbo Squeegee has the same large diameter of the tube as all of his wider brothers. Due to its narrow width of 10cm, this squeegee is ideal for fitting in window at the edges of rebates. This squeegee is also often used as a cleaning squeegee to pull away and remove any dirt in the water at the sides of the window.

Price per unit

Big Turbo Squeegee - 17 cm

150-112

- Width: 17 cm

The Big Turbo Squeegee is the squeegee to apply large areas in one go. The advantage of the Big Turbo squeegee is the larger diameter of the tube with which it is held. Therefore, you can apply more force without tiring your hand and wrist. The black rubber blade is medium stiff. On the sides of the tube are ridges for extra grip which prevent the tube from slipping and sliding in your hand.

Price per unit

Big Turbo Squeegee - 23 cm

150-111

- Width: 23 cm

The Big Turbo Squeegee is the ideal squeegee to apply large areas in one go. The advantage of the Big Turbo squeegee is the larger diameter of the tube with which it is held. Therefore, you can apply more force without tiring your hand and wrist. The black rubber blade is medium stiff. On the sides of the tube are ridges for extra grip which prevent the tube from sliding and slipping in your hand.

The SOTT® Max - 13 cm SOTT

150-006

- Soft but resilient

The SOTT Max is by far one of the most important squeegees that a window tinter should have in his/her possession. Due to the combination of stiffness and flexibility, the squeegee gives an enormous pressure during squeegeeing, so moisture can often be pushed away at once. Especially for window s and safety s on flat glass.

QUICK TIPS

Use with:

Price per unit

The SOTT® Max Angle - 13 cm SOTT

150-006S

- 13 cm; trapezium shape

The SOTT MAX SHAPED corresponds to the standard SOTT MAX (150-042S) except for the shape on both sides. These run into a point, making it easier to push moisture away from edges and corners. Due to the combination of stiffness and flexibility, the squeegee gives an enormous pressure during squeegeeing, so moisture can often be pushed away in one go. Especially for hard window s and safety s on flat glass.

QUICK TIPS

Use with:

Price per unit

The Clear Max - 13 cm

150-012

- Softer than the Blue Max, but better for the rear windows.

The material used for the Clear Max is softer and so moves the moisture from beneath the much more efficiently; especially when the surface is slightly uneven as with rear windscreen demisters or dot matrix raster.

QUICK TIPS

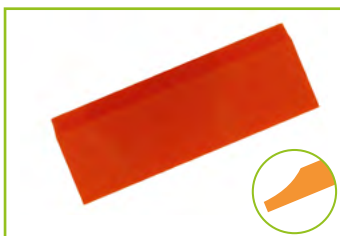

Use with:

Price per unit

The Orange Crush 130 - 13 cm

150-050

- 13 cm (5") wide; harder than the Blue Max

The Orange Crush is a polyurethane squeegee that is slightly stiffer than the Blue Max. This makes it the perfect all-rounder. This squeegee is ideal for removing moisture from beneath a variety of s including window , polyester laminate, thick safety s and even s covered in application tape.

QUICK TIPS

Use with:

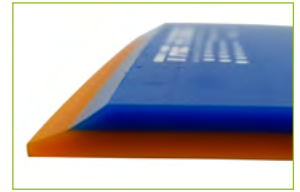

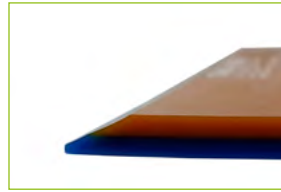

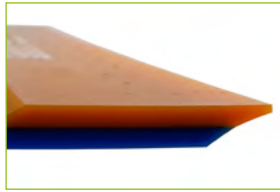

Price per unit

THE HYBRID - A multitalent: 2 Squeegees in One

- A multitalent: 2 squeegees in one
- Blue side: medium hard, orange side: soft
- In 2 widths available

This unique polyurethane squeegee consists of two layers, each with a different hardness. The orange side is softer than the blue side. The squeegee angles on either side are different as well, giving you full control over the right amount of pressure during installation.

13 cm wide

Woody Grip Squeegee - Ultimate Tool for Safety s

150-054

- Wooden handle for 2 hands at the same time
- The Ultimate tool for Safety s

The WOODY is a block squeegee where pressure can be applied with two hands at the same time. The advantage is that one does not have to squeegee over the same spot several times, as the pressure is so high that only one or two strokes are necessary. This squeegee makes working faster and therefore more efficient. This is indispensable if you need to apply window s to many large windows.

Now you can install safety window s thicker than 200 microns with ease without the risk of leaving a lot of water underneath.

Replacement blade:

150-054R

Price per unit

Pressure Squeegee for Woody Grip

150-054R

- 5 cm x 20 cm

This block-shaped pressure squeegee is intended to be used in the WOODY grip. The sturdy nylon ensures the right pressure when installing window s on large surfaces.

High performance hand grips FOR MORE POWER

If you want a perfect installation of window s, these hand grips are your best friend. On this page you will find the small versions. Simply insert the desired squeegee into one of these hand grips and you're ready to get your job done!

SOTT® - 5 Hand Grip SOTT

150-042S

Special handle, made of high-quality plastic, for clamping special squeegees. These handles have a better and longer grip, so they can be held securely without getting tired of squeegeeing. In addition, it is extra comfortable because the grip area is covered with a non-slip foam. Due to the curved shape and the special smooth plastic, the handle will not touch or damage the when a lot of pressure is applied to it. This is the handle for soft squeegees, to squeeze s with the wet method. Particularly suitable for thick and hard s such as security s and window s.

Price per unit

SOTT® - 5 Short Grip Handle - Extra Short SOTT

150-042SM

- Short handle: 8 cm

Same as 150-042S Hand Grip except shorter handle. This strong heavy-duty handle is ideal for use in small areas where space is limited. Often the handle is too long and you can't rake properly because the back piece gets stuck. With a handle length of only 8 cm, it does not stick out from under your hand and you can squeeze it perfectly in small spaces while still being able to use force to push moisture out from under the . Made of strong nylon.

Price per unit

Fusion - 5 Hand Grip

150-042

FUSION hand grips offer an improved and extended grip reducing fatigue from squeegee work during those long applications. Extra comfort is provided by the anti-slip foam coating on the actual gripping area. The curved form of this special smooth plastic hand grip prevents it from coming in to contact with when extra pressure is applied, so any risk of damage to your work is eliminated. This is the ultimate hand grip for squeegees used for the wet application of . Perfect for use with thick and hard s, such as security and window .

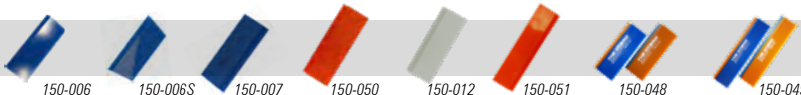

Price per unit

QUICK TIPS

Perfectly combine with the following squeegees:

Short - 13 Hand Grip

150-039

- Rubber anti-slip handle

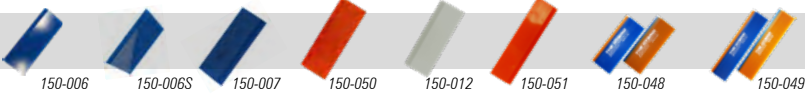

The SHORT-13 is an ideal handle for installing window s in environments where space is limited. Because the handle is only 10 cm short, it can easily be used in any angle and environment. Think of rear windows of cars, side rear windows in compact or hatchback models, etc. The rubber handle prevents slipping in situations when hands are wet.

The plastic squeegee is simply clamped into the jaws (note that it is not secured with screws). Intended for squeegees of 13 cm width.

QUICK TIPS

Perfectly combine with the following squeegees:

Heavy Metal POWER HANDLE SQUEEGEES

Power Handles are ideal squeegees for the application of window s where extra pressure is needed during the pushing away of the moisture under the . These squeegees are used especially for thick window s such as security s.

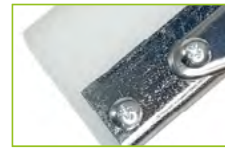

The metal frame provides stability and does not bend under pressure. The handle has small recesses so that wet hands still have a good grip on the handle. The replaceable nylon squeegee in the frame is medium stiff, available in different sizes and shapes.

Rubber grip with recesses avoids slipping when wet.

Strong curved metal neck for better angle.

Metal body holds the squeegee in place.

Power Handle - 15S + Shaped Squeegee - 15 cm

150-055-S

- 15 cm
- Shaped squeegee blade- shaped squeegee blade

Power Handles are ideal squeegees for the application of window s where extra pressure is needed whilst pushing out the moisture from underneath the . These squeegees are especially made for thick window s such as security s. The metal frame provides stability and does not bend under pressure. The handle has small recesses so that wet hands still have a good grip on the handle. The replaceable nylon squeegee in the frame is medium stiff, has a length of 5 cm and has a 'shaped' front, which provides extra pressure during squeezing.

SMART TOOLS

Intelligent tools for precise and fast installation of adhesive , even in the most complex installations. Thanks to our selection of innovative tools, you can apply your adhesive with greater ease and efficiency, for a perfect result.

- 2 Usable ends
- 2 Different-sized, rounded tips
- Metal guides

An ideal, nifty tool that helps install wraps and window s in hard-to-reach places. With two metal rounded tips in different sizes. The hexagonal body in the size of a pen is ultra handy, enabling you to control the tips to place and guide the into a particular spot. Durable plastic housing. Chrome-plated guides.

The Guider

the perfect tool for wrapping

Price per unit

- Press down in the smallest little areas
- 2 Different spoon positions
- Coated metal spoons

A must-have for every installer. This pen-style tool has two smooth metal spoons, each at a different angle. The spoons are flat to allow for to be expertly pressed down in otherwise unreachable places. Think of corners of car hoods, between rear lights and headlights, around grilles and door handles.

The Finisher *the solution for all holes and tight corners*

- PRESS UNDERNEATH RUBBERS OR WINDOW FRAMES, IN ANY HOLE OR CORNER.
- USEFUL IN ALL SITUATIONS.

SOTT® Wrap Tweezers SOTT

Handy tools for easy installation in hard to reach places

*win the fight
with small corners
and seams*

Each car wrapper and installer knows:
Pushing vinyl into small corners and cutting or wrapping around hard to reach areas can be quite a fight.

Specially designed for those tricky jobs are SOTT WRAP TWEEZERS.
3 different types of tweezers, each with its own purpose.
Now you master every little part on the car. Made of stainless steel.

Wrap Tweezer I

350-311

- Flat round nose
- Pulls the vinyl without destroying it

The stainless steel Wrap Tweezer-I has a special flat round nose that can hold the vinyl without the risk of tearing it while pulling it around corners. Cut the vinyl to size, heat it up and guide the vinyl around corners using the rounded tips. You're done.

Price per unit

Wrap Tweezer II

350-310

- Curved end, with point
- Extra thin and precise

Stainless steel tweezers with curved ends. Both points are sharp and fit well together so that vinyl can be easily picked up within cracks, seams, headlights and taillights, etc. Whenever there isn't anything else that can be used to get the vinyl in deep crevices of the car, the Wrap Tweezer-II is the solution.

Price per unit

SOTT® Tweezer SOTT

350-201

- Round shape, flat inner surface
- Sharp point

This coated pair of tweezers has a sharp pointed nose that curves on the outside while being flat on the inside. Ideal because now you can keep your grip when handling the vinyl while the outside, due to its curved shape, doesn't stick to the vinyl.

Price per unit

A challenge for all installers and sometimes (almost) impossible: placing and pressing down adhesive into small corners, gaps and holes. Wouldn't it be great if there was a tool for that! Oh yes, SOTT sells it. A pair of elongated squeegees that work together as a team to tackle any job. Here they are: The Squad.

These specially shaped squeegees are designed to apply any type of in hard-to-reach places. Whether it's for wrap , window or interior , thanks to their various special tips these tools can literally be used anywhere and in any situation. They are made of durable plastic so that they will not break, fray, buckle or curl easily. Several of the tips have sharp flat edges, to make it easier to push them into the smallest gaps. Despite this your will not be damaged because the tip material is smooth and shows no burrs. In short, a must-have for every installer who relies on fast and efficient work methods. Supplied as a set in its own case.

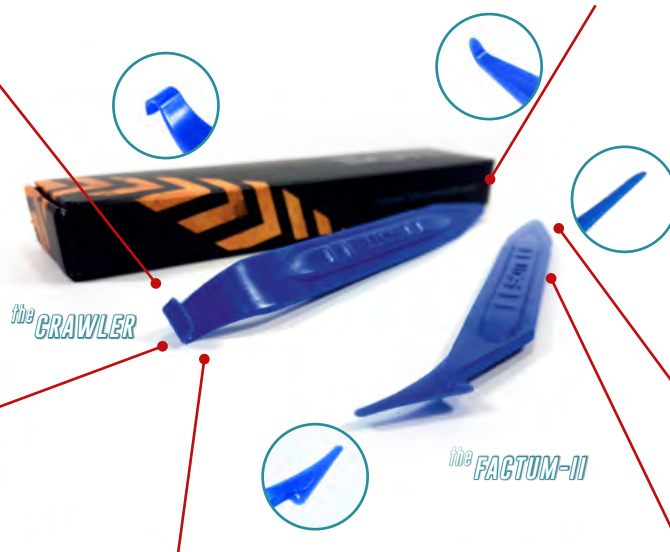

The smooth semicircular curved shape allows the installer to press down adhesive behind seams and edges. Ideal for spots that normally would be out of reach.

The curved tip tapers off and is ideal for pushing into corners and giving just that little bit of extra pressure to the rear side of edges, panels, doors etc.

Due to its smooth tapered shape, it is ideal for pushing all kinds of into any conceivable shape without damaging it.

The tapered tail is quite stiff, yet flexible enough to push rubbers away from windows and other vehicle body parts. Because it is tapered and very smooth, it is a great tool for positioning windows before the water is squeegeed out from behind it.

The Factotum II saw some improvements over version I. The tip tapers off and has a sharper edge. It is stiff, yet flexible. This allows a lot of force to be applied when pushing into the smallest of channels and creases, but it won't break.

This is useful too: use the rounded tip for scraping off adhesive and small pieces when removing .

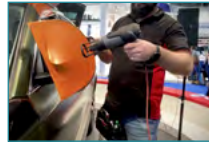

Mirror Wrap Tool Wood 38 cm **NEW**

350-200

- Wrap a mirror in the blink of an eye

This is a must-have for all wrappers! Every wrapper knows that wrapping a mirror is not that easy. If the mirror is not heated and stretched evenly, distortions, discolouration or glue streaks can occur. The Mirror Wrap Tool makes this all much easier.

How to use:

1. Stick the tool over the arms of the Mirror Wrap Tool.
2. Heat the mirror evenly. And now push the mirror through the arms in one movement.
3. Viola, the mirror is evenly stretched over the convexity of the mirror.
4. Now carefully remove the tool from the arms and work the tool near the edges of the mirror as you would.
5. Just post heat and you're done.

Emblem Removal Tool **NEW**

350-203

- Remove emblems without damaging them
- Aluminium handles
- Strong braided wire

Every car wrapper and ppf installer knows this problem: emblems on the bodywork that need to be neatly removed without damaging them. This handy tool makes this easy. A strong thin wire between two aluminium handles cuts the glue between the bodywork and the emblem without being damaged. Place the wire at the beginning of an emblem, against the glue (foam), pull the wire tight and now pull it back and forth. The wire slowly and neatly cuts through the glue layer. If necessary, you may also heat the emblem a little to soften the glue.

QUICK TIPS

Comes in handy storage box. Includes 1 extra wire.

Price per unit

Cutting Knife Holder for Carton Box

100-030

- Turn your foil box into a cutting dispenser
- Cut your foil directly from the box

Small aluminum knife holder that is easy to place on the edge of the foil box so you can cut your foil to a specific width directly from the box.

TIP: tape the beginning of your foil to a tube so that you have the same tension over the entire width when pulling up and cutting through.

QUICK TIPS

WE RECOMMEND these break-off blades are the best for this application:

120-BD-100A

120-SAB-10

How does it work?

1. Turn back the socket at the slot so that the slot is completely free.
2. Clamp a snap-off blade into the slot, sharp side down.
3. Tighten the socket so that the bolt clamps the break-off knife.
4. Now place the knife holder on the edge of the box, with the shear blade pointing inward, towards your foil inside the box.
5. Now pull your foil up a little and insert the foil through your knife blade.
6. Now gradually pull your foil up in one smooth motion, as far as you like.

SOTT® Air Release Tool - Aluminium Body SOTT

100-NP-1

- With retractable needle
- Aluminium version
- Professional quality

The SOTT AIR RELEASE TOOL has the size of a pen and lies well in the hand thanks to its thickness and non-slip front.

The ultra thin and sharp needle gives you the ability to accurately and very locally prick away air bubbles. The needle is by means of an internal spring to pull so that this bubble piercer safely stored. The needle is not replaceable.

Price per unit

Air Release Tool - Black

100-NP-2

- Ballpoint model
- With retractable needle

Air release tool in ballpoint shape with razor-sharp needle inside. Simply click on the back and the needle comes out of the shaft.

Click again and the needle will retract. Ideal for mounts where air bubbles have formed between the and substrate. Delivered in luxury box. The needle is not replaceable.

Price per unit

Injection Needle - Ultra - Thin .45

350-221

- 0.45 mm thick
- Bevelled tip for invisible penetration

By using this syringe together with the 350-220 syringe you have the solution to suck out moisture bubbles under paint protection s (PPF).

How does it work?

Pierce the needle horizontally in the bubble and suck the water into the syringe. Take the needle out of the vacuumed bubble and press the small hole closed with your thumb. Within a few hours, the hole will be invisible and 'healed'. Viola, your perfect assembly is ready!

Price per unit

Injection Syringe - 10 ml

350-220

The ultimate solution! A Must-have for every PPF installer!

Every PPF (paint protection) installer knows it: somewhere in the middle of the bonnet a big water bubble. What can you do about it? Pull off the complete and start all over again? Not at all. You don't have to! Just use a syringe with an ultrathin needle to make an invisible hole and suck the moisture out of the bubble!

How does it work?

Pierce the needle horizontally in the bubble and suck the water into the syringe. Take the needle out of the vacuumed bubble and press the small hole closed with your thumb. Within a few hours, the hole will be invisible and 'healed'. Viola, your perfect assembly is ready!

INSTALLATION TOOLS

A complete range of intelligent tools designed to make the installation of adhesive on glass surfaces quick and easy. Professional-grade tools for fast, accurate installation that will save you time on your projects.

- Define cutting lines before install ppf
- Define working lines* on any vehicle
- Position lettering along a predetermined line
- Create a flexible ruler for cutting purposes

This 6 mm (25") plastic tape is a revelation for every fitter. Easy to stretch and shape, does not leave adhesive residue. Quite thick, so doesn't tear or break easily. Cutting and Contour Tape is ideal for:

QUICK TIPS Size: 6 mm x 55 m

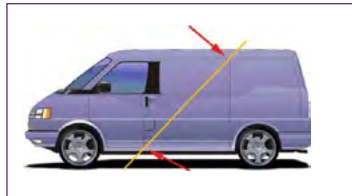

Defining working lines:

Define working lines on curved or wedge shaped cars. This will create a fixed working line that will follow the form of the car. Use this line as a reference for positioning your sign to ensure that it is visually correct.

Establish cutting lines:

If needs to be cut to follow a desired form then Cutting and Contour Tape is the ideal solution. First apply the , use the tape to create the desired form, and then simply cut carefully along the tape. The red and blue panel shown on the photo can be cut entirely freehand. The top of the full colour print that runs away slightly at the top can also be cut perfectly using the Cutting and Contour Tape.

Defining working lines:

Defining simple working lines before starting the application of any lettering will enable the correct layout of text and logos. Tip: use fixed reference points, such as the corners and edges of doors and panels. This will simplify the layout of the opposite side of a vehicle as well as making any future repairs much more straightforward.

PPF bulk installation with cutting tape

Use this tape to place the correct cutting lines. Then install the PPF as you normally would. Now cut through the ppf , and on top of the cutting tape. Pull the cutting tape from under the ppf while spraying water under the . Result: nice cut and the paint is not touched.

QUICK TIPS A working line is an invisible contour reference line running horizontally over the length of the vehicle. Some cars already have a working line added during the forming of the bodywork. However, this is becoming less common in the more recent car models.

Price per roll

Do you need to layout text and large prints before final application? This industrial class tape is a hefty 5 cm (2") wide, has strong adhesion, but leaves no adhesive residue, even after several weeks. Not affected by water.

An ever-increasing number of bodywork components are being manufactured from composite materials. This is why you need Application and Positioning Tape.

QUICK TIPS Size: 50 mm x 50 m

This may also be of interest:

150-MM882

150-MM883

Price per roll

- Install over rivets, in channels and on bricks in no time!

The well-known RollePro is the only tool that really works for installing around rivets and applying wall s to brick or stone walls. The RollePro has a hard foam wheel that presses the into and around curved or uneven surfaces. Install the over the surface, warm it up and roll the RollePro over the shape or surface. Keep pressing firmly until the has cooled off, then heatfix and you're done.

Warm up the and roll RollePro simply over rivets channels, grooves or joints.

In this image you can see that the hard foam wheel easily takes the shape of the curved surface.

Even coarse bricks are no problem. The RollePro easily pushes the into irregularities of stones, bricks and joints.

Price per unit

SOTT® Roller - Heavy Duty SOTT

- 150 mm (6") wide
- Top-heavy version; with bearings

Professional roller mounted in ball bearings and intended for intensive use. Top heavy means that the actual rubber roller is the heaviest part of the tool allowing extra pressure to be exerted during application procedures. This is especially evident during the application of large areas of . Less pressure needs to be applied as the roller does most of the work.

IDEAL FOR:

- APPLYING LARGE AREAS OF WITHOUT AIR CHANNEL TECHNOLOGY BUT SOLID ADHESIVE
- APPLYING APPLICATION TAPE
- APPLYING LAMINATE
- APPLYING HIGH TACK S ON FLAT SUBSTRATES

The rubber roller is bearing mounted and so runs exceptionally true, offering highly efficient and effective rolling.

A good example of the use of the SOTT ROLLER: Covering large surfaces (such as a table) on your own with for example an interior with a very strong adhesive can be a challenge. With a roller, it is very easy and hassle-free. The roller gradually presses the onto the surface without tension or stretch, while a squeegee pushes the away slightly. On large surfaces, this can then cause a little tension. Not with the SOTT ROLLER!

Price per unit

Installation Roller *NEW*

- Aluminium frame
- Medium soft rubber wheel

Special pressing roller for installation of s in channels and trenches in vehicle bodywork. The advantage of a roller over a squeegee or rubbing with a glove, is that the (heated) does not poach. A roller pushes the everywhere evenly into the trench without moving it.

Tiles is not an easy surface to cover, especially when you must conform the inside the joins. Here is a tool that will help you out during this installation

INSTALLATION ROLLER
for channels and trenches in vehicles

Price per unit

*it's bigger
it's stronger*

it's **THE GOLIATH!**

All installers and signmakers use them.
The mounting magnet. With larger pieces of vinyl, however, one magnet just isn't enough. We have something better for that task. An extra-strong magnet, with a special handle. It's a monster! We call it The Goliath!

SOTT® Goliath Magnet - Extra Large SOTT

150-MM883

*super
strong
and no
mistake*

Mounting Magnets are now indispensable when installing vinyl and other s.

But we missed a satisfying solution for holding up large sheets of with just one tool - frustrating!

That is why we designed this special mounting magnet assembly and while we were at it made it multifunctional as well.

Specially designed for the true installer who appreciates efficiency and convenience while he works.

STANDARD MOUNTING MAGNET

THE GOLIATH

MORE THAN 24 KG OF PULL!
REPLACES 4 ORDINARY MAGNETS
MULTIFUNCTIONAL!

the 5 advantages of the goliath

EXTRA STRONG: MORE THAN 24 kg OF PULL!

There are 2 different attachments available that add a completely new function to The Goliath. In an instant create a third hand when working with the hot air gun or create a special rack for your squeegees and fluids*. Nothing is more annoying than magnets and fall down whilst positioning. The standard magnets often turn out to have too low a magnetic force, which means you end up using several magnets to do the job. Thanks to The Goliath this is a thing of the past. The base contains 6 Neodymium magnets that together develop a minimum of 24 kg pulling force. The Goliath is so strong that one of them can hold up a 1,52 m x 5 m of . So just clamp it down with The Goliath and start installing!

LIGHT GREY BASE FOR BETTER DIRT CONTROL

Avoid stains caused by your tool. The Goliath has a light grey rubber base that shows dirt well. By cleaning it regularly you can be sure that the magnet won't leave any dirt traces.

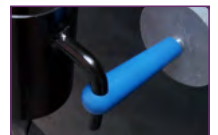

ROUNDED HANDLE: PREVENTS DAMAGE TO THE

Often during installing the upper part of the drops over the magnets, causing ugly kinks or folds in the . The Goliath however, has a rounded top to prevent this.

10 mm (0.4") HOLE FOR ADDITIONAL ACCESSORIES

Toward the top of the handle there is a 0.4»(10 mm) hole. This creates interesting possibilities for The Goliath. Available accessories are simply stuck into the hole, creating a whole new functionality for it.

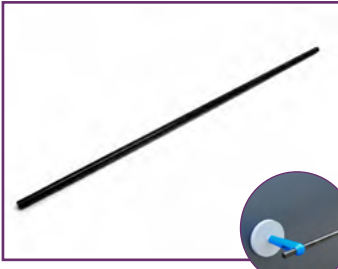

QUICK TIPS

Perfectly combine with:

150-MM885

Price per unit

- YOUR 3RD HAND DURING INSTALLATION

Materials and tools often clutter up the space around the vehicle during installation. What could be nicer than a handy bracket to hang your cloths and spray bottles? Installers often find they just haven't got enough hands for everything. A third hand would be so welcome. We have the solution for both problems.

CLEAN AND ORGANIZED WORK

Workshops usually look like this: rags and degreaser spray bottles everywhere and installers running around cars looking for them. Simply use the SOTT dispenser to keep all the articles off the floor, so that everything stays clean - plus you have everything within reach.

**Note: these accessories require 2 Goliaths.*

YOUR 3RD HAND WHILST PRE-STRETCHING

The newest method to wrap small round shapes such as a door handles, antenna bases or mirrors, is to pre-stretch the to stretch and then, during the installation, to heat-shrink it again. The SOTT Dispenser is your perfect assistant! Attach the to the bar and you can heat and stretch it as much you like.

*Product information:
The SOTT Heat Gun Holder is made of durable black passivated metal so it's corrosion-protected.*

QUICK TIPS

Note, The SOTT Heat gun Holder only works with two magnets type:

150-MM883

The SOTT Dispenser simply fits into the holes in the handles of The Goliath mounting magnets.

With a length of 60cm it is the ideal bar to pre-stretch the vinyl before you start wrapping, say, a mirror.

Hang your cloths, spray bottles, etc. on the SOTT Dispenser and your tools will stay clean and be at your fingertips.

Price per unit

Forget all the standard magnet

introducing the SOTT Magnet

SOTT® Mounting Magnet SOTT

150-MM882

Just about every signmaker, carwraper and installer uses them. Mounting magnets. This handy tool keeps the sheet of on the car body during positioning and installation. There are many types and shapes available, always with some kind of problem: too sharp, handle too small, the rubber rubs off or simply not powerful enough. Here is the SOLUTION:

A mounting magnet designed by people who really gave it some thought and that combines many advantages into one. Forget about the rest. From now you'll only want to use the SOTT mounting magnet.

THE MUSCLE MAN: MORE THAN 7.5 KG OF PULL!

A common complaint of installers is that mounting magnets often lack just that little extra in force. The SOTT mounting magnet solves that issue. The base contains 6 Neodymium magnets that combine into a magnetic force of over 7.5 kg. As a result, fewer magnets are needed in one place to keep the sheet in place, which won't fall readily off the car.

LIGHT GREY BASE FOR BETTER DIRT CONTROL

Avoid causing stains with your tool. The Magnetor has a light grey rubber base that clearly shows dirt settling on it. By cleaning it regularly you can be sure that the magnet won't leave any traces of dirt.

ROUNDED HANDLE: PREVENTS DAMAGE TO THE

Often during installing the upper part of the sheet drops over the handles of the magnets, causing ugly kinks or folds in the at the spots where it touches the handle. SOTT mounting magnets, however, has a rounded top to prevent this from happening.

QUICK TIPS

Order quantity per piece

Price per unit

- 4 Storage compartments
- Belt included

This mini tool bag has a width of 13 cm and is ideal for installers who only need few a different tools for their installations. The tool bag has 3 compartments on the front and a hidden compartment on the back. On the front there is also a loop to attach a tape measurer.

QUICK TIPS Belt included 

Price per unit

- The most versatile toolbag available
- Belt not included

Professional installers often find themselves doing acrobatic feats to get to their tools whilst working. SOTT wants to respond to the needs of installers. So SOTT designed a special ToolBag which fully meets the requirements of professional installers across Europe.

MAGNETIC COMPARTMENTS

There are magnetic plates sewn into the material to conveniently stick your installing magnets.

BLADE STORAGE COMPARTMENT

No more old dull blades lying around! Put them into the special section in the 120-OLFA AB10 or 120-DB blade box. This box is specially made for this purpose.

SPECIALY DESIGNED KNIFE COMPARTMENTS

8 knife compartments with custom depths of 8 and 10 cm to make sure your knives always peek out a little. This way you can grab and return them quickly.

SAFE TAPE MEASURE HOLDER

The tape measure holder is made of sturdy plastic to avoid inadvertent damage when you lean against a car.

MOUNTING TAPE HOLDER

On the bottom of the TOOLBAG there is a belt with a quick release. Attach your mounting tape there to quickly grab it when you need it.

PROTECTED AGAINST DAMAGE

SOTT's TOOLBAG is especially made of industrialgrade textile material and has an elliptical shape to reduce the change of scratching the vehicle.

STURDY PLASTIC STRAP

SOTT chose to use a sturdy, industrial-grade strap that doesn't bend or collapse when your TOOLBAG is filled with tools.

QUICK ACCESS SQUEEGEE POCKETS

The TOOLBAG has 2 extra pockets with adjustable depths for squeegees that you want to grab without looking.

EXTRA MAGNETIC POCKET

On the front there is another magnetic pocket underneath the material to stick metal tools or screws. Ideal and very clever!

SPECIAL SHAPE

SOTT's TOOLBAG has one large compartment in the middle for gloves, wipes, etc. It has a special shape, so it doesn't bother you by wiggling between you and the vehicle. This reduces damage-prone situations.

- Everything you need, carried in 1 toolbox

A standard toolbox can't contain all the tools you need during a carwrap job. As always, you just don't have not enough compartments for your special knives and squeegees, bottles will topple over and so on. But not anymore! Now you can have the SOTT Toolbox.

*Bigger = Better
Up to
more space!* **200 %**

LARGER FORMAT: VOLUME 30 liter

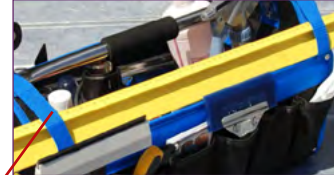

With a slightly bigger footprint of 52 cm x 30 cm the SOTT TOOLBOX has a capacity of 30 liters. So you will have everything you need right by your side.

2 BOTTLE HOLDERS

The SOTT TOOLBOX comes with two additional bottle holders that can be attached to the TOOLBOX with Velcro. Now you can take up to 4 (Spray-) Bottles along without them toppling over.

RULER HOLDERS

As many as 4 sturdy straps with Velcro hold your longer tools, such as cutting rulers.

22 ATTACH STRAPS

Along the inside of the TOOLBOX are 22 tool straps for you to store your tools. They are designed for quick access, just as everything about this tool box is!

QUICK ACCESS POCKETS

Knives and pens are easily accessible for use on the front of the box and there is space for your mobile phone as well.

18 COMPARTMENTS

As many as 18 compartments on both sides for your squeegees, blade holders and many other tools and materials.

6 PLASTIC FEET

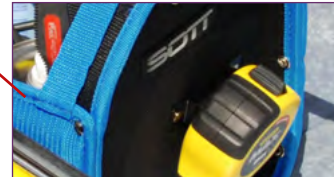

The box stands on 6 large plastic feet that avoid damage and soiling of the TOOLBOX when it sits on the floor and keeps it dry.

STAINLESS BRACE WITH HANDLE

Comfortable to carry thanks to the strong stainless brace with handle.

TAPE MEASURE HOLDER

On the back there is a strong metal clip for your tape measure. Everything is designed for quick access.

SHOULDER STRAP

Standard supplied with shoulder strap that can be attached to the special braces on the box.

Workseat - with Gas Lift

400-019

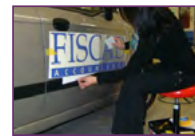

- An end to backache!
- For easy movement around the car while applying your signs.
- No more tools lying around!

This is extremely convenient: a gas-lift work stool with a tool tray and castor wheels. The soft, comfortable upholstery keeps you comfortably seated even during lengthy jobs. Underneath the seat, a ring has been fitted with which you can operate the gas lift, adjusting the height to your exact preference.

The tool tray consists of three compartments for the tools you're working with, separated by a ridge.

The castor wheels include bearings and are made of hard plastic, with full rubber, durable and easy-rolling tyres. Very good adhesion to all types of substrates except granite. With one tube you can seal about 35 linear meters.

Sealant DOWSIL 995 - High Impact

600-995

- **Extremely strong and resilient**
- **Also works as a bonding between and glass/frame**
- **305 ml**
- **Colour: Black**

This odourless industrial sealant with high tensile strength is ideal for structural bonding between (safety) window s and glass. The sealant also seals particularly well against corrosion, leaks etc.

Great for bonding window s to the edges of the glass/frame in situations where break-ins, falls through or explosions are a possibility. With one tube, you can seal about 35 linear meters.

- *Non-corrosive curing system. Fully dry and at strength after 20 days.*
- *Hardens into an extremely tough elastomeric rubber that ensures a durable, flexible, watertight bond.*
- *Excellent weather resistance and high resistance to ultraviolet radiations, heat and humidity, ozone and extreme temperatures.*
- *Excellent adhesion without primer to numerous surfaces including coated, tempered, and reflective glass and anodized, plastic or painted aluminum profiles including most fluoropolymer-based paints such as Kynar.*

Price per unit

Sealant SILIRUB2 - Normal

600-752

- **Silicone sealant**
- **300 ml**

3M® Edge Sealer 3950 3M

600-3950

- **For sealing the edges of PVC s**
- **0.23 L Container**

3M Edge Sealer 3950 is a clear varnish that provides a water and dirt tight seal between the edge of self-adhesive PVC s and the surface. It can also prevent edge curling.

Edge Sealer is resistant to water, mild acids and salts. Not resistant to hydraulic oils and greases. Edge Sealer can be removed with isopropanol alcohol and citrus-based cleaners.

How to use:

- *Before you begin, test it out to make sure that the Edge Sealer does not affect the surface.*
- *The surface and the must both be degreased and clean.*
- *Make sure that the 's edge is well pressed in accordance with the manufacturer's guidelines.*
- *Do not dilute.*
- *Do not leave the lid off the jar for too long; this will reduce how long the contents can last*
- *Apply the sealer with a 6mm thin brush in one smooth movement.*
- *Make a 6-10mm seal edge, covering both the and the surface.*
- *Avoid gaps between the different seal edges.*
- *Allow the seal edge to dry for 24 hours.*

Post-heating on the right temperature?

TESTING is knowing!

Heat-setting the after working it into channels and recesses is a necessity. Whether this is done with a hot air gun or torch, one question remains: how do you know if the has acquired the right temperature?

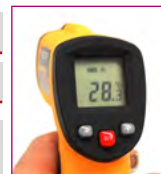

The SOTT Infrared Meter measures it for you. Fast and simple. You simply aim the laser at the object you are heating up, and the gauge will immediately indicate the current temperature. Added to that you can keep the last temperature reading by releasing the front button. An ideal and indispensable tool for any signmaker, car wrapper or interior installer who needs to know whether the right temperature of the has been reached. Includes a 9 volt battery.

3 ADDITIONAL FUNCTION BUTTONS

Light button for display illumination.

Set to Celsius or Fahrenheit.

The laser pointer must be turned on and off manually.

Gas Torch - with 13 mm Fine Burner **SIEVERT**

- Reshaping or heat-setting is faster and has better results
- Heat-set the in those awkward places without heating the adhesive layer and substrate

High quality gas burner - Sievert - Made in Sweden. Especially intended for working and heat-setting in channels*. This burner produces tremendous heat allowing the correct temperature to be achieved in a fraction of the time when compared with using a heat gun and a temperature gauge.

The main disadvantage with a heat gun (paint remover) is that it also heats both the bodywork and the adhesive layer. This is highly undesirable as this is also the removal temperature.

In short, a burner is the best solution for heat-setting to all of those awkward areas.

Flame temperature: 1.925°C!!!

The tip of the blue flame reaches 1.925°C (3,500°F) and releases heat instantly. This is in direct contrast with a heat gun that supplies heat via an air stream.

The burner is moved quickly over the surface, so it only heats the upper layer. The lower layer and the adhesive layer remain unaffected by the heat and so do not melt. The itself is heated to a casting temperature (more than 205 °C) in a fraction of a second, but cools instantly when the burner is removed.

Burner Starter's Kit

400-BB-2235

Infrared Nozzle - No Air Displacement

400-BB-8708

- Does not blow hot air
- 1700 w of direct radiant heat

Special attachment for the SIEVERT Cyclone gas burner. This attachment is special because it gives instant radiant heat from the flame inside it, without any blowing or air displacement. This lack of blowing ensures that your does not get blown against bodywork as is often the case with hot air guns, or that surrounding areas of are subjected to unnecessary heat. This infrared attachment provides instant radiant heat without taffecting the flow of surrounding air. Manufactured from durable metal.

Solid construction in durable metal.

The flame from the burner is safely encased in the attachment so it cannot cause fires.

Price per unit

Simply Heat Up Corners and Fixate them together

The CORNERSEALER

Are there tools that can simplify installation? Yes, definitely! SOTT introduces a selection of handy tools that no installer should go without.

Have you ever had small creases pop up at the corners of a wrap? Or small overlaps that lose their adhesion? This practical tool is intended for releasing the tension off installed edges around corners.

The CornerSealer allows you to melt small creases or curly edges and close or flatten them.

Within seconds, the flat head gets hot enough to melt the .

Simply push the hot flat head against the crease or overlap and 'melt' the (s) together and/or in place.

This effectively fixes the edge of the until it is tension-free in its new shape. The flat head allows you to melt small creases or curly edges and close or flatten them.

PERFECT FOR:

- FIXATING THE EDGES OF WRAPPED AROUND CORNERS
- MELTING TOGETHER SMALL OVERLAPS

HOW TO USE:

1. Make sure is clean and degreased
2. Activate the device to preheat the flat head. This takes about 10-15 seconds (preheating time increases with deteriorating batteries).
ATTENTION! Head can get hot!
3. Avoid skin contact to prevent injury
4. Place the flat head against the area and push down firmly
5. Avoid overheating! 1-3 seconds of pressing is usually sufficient

RFX Applicator for Application Tapes

500-017

Troubled by air bubbles or wrinkles when applying application tape to your ? Just use the RFX applicator. This handy little tool is 30cm wide and totally removes any creases or air bubbles between your application tape and .

Price per unit

professional ROLL SUPPORT

Simply and quickly slide the roll guide into the special position slots.

Perfectly finished endcaps smoothly slide into the position slots. This stabilizes the dispenser even more.

The dispenser comes complete with mounting brackets, screws and an Allen key. Just put it together and it's ready for use.

Corner brackets that can be mounted as needed so the dispenser «clamps» onto the table are included.

The two aluminium roller guides enable you to unroll your vinyl or application tape either from the top or the bottom.

The stable dispenser construction enables the perfect unrolling of wide rolls, such as carwrap s, without any kinks or creases.

The roller guides are made from anodised aluminium with a metal profile along their entire length to prevent sagging

Rubber feet ensure it solidly sits on your table and they prevent damage. The dispenser can also be bolted to the table. A screw hole is provided for that purpose.

Has a perfect and safe finish thanks to its coated, solid metal build and rounded corners.

The HANDLER

*cut window perfectly straight
anywhere you like*

*Perfectly
STRAIGHT
and
ANGLED
CUTS*

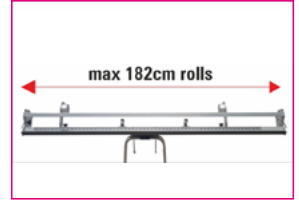

Hang the handler on the wall or place it on a stand or stairs.

- Simple straight and angled cutting of window
- The ideal solution for on-site cutting
- Cut 2 or 3 pieces at the same time, perfectly straight!
- Rigid aluminum frame

Cutting window to size is not always easy. But with the handler, this is history. Simply place your roll of between the holders and pull the vertically down between the blade holders. Viola, you have a perfectly straight cut.

Now fold down the special clamping bracket against the and now cut your desired size horizontally against the guide. The clamping bracket ensures that the does not fall to the ground. Now you can pull any piece you cut out from under the bracket without the rest falling. is at a premium.

Lightweight, made of aluminium. Available in two sizes: for max 152 cm rolls and max 182 cm rolls.

The handler has 2 adjustable blades, so you can cut two or three jobs at once.

The roll holders are adjustable to any size.

Also, the roll holders have an adjustable braking system so the won't accidentally unroll.

Yup, it's here: **HOZELOCK**

Goes SOTT

THE FIRST UNIQUE SPRAY BOTTLE DEVELOPED BY SOTT AND HOZELOCK

- HEAVY-DUTY COMPONENTS
- BUILDS UP INCREDIBLE PRESSURE
- 1,25 LTR (42.3 OZ) CONTAINER
- UNBREAKABLE HARD SHELL CONTAINER

Easy to read icons, specially designed for the professional industry.

How-to-use instructions are printed on the container.

Indication in two measurement units.

Adjustable spray head for fine-tuning.

Heavy-duty pump handle.

**A must-have for every installer
in the Signage, PPF,
and Window industry.**

SOTT® Pressure Spraybottle - HOZELOCK - 1.25 L SOTT

550-4075

High quality pressure sprayer with 1250 ml contence, for the moisturizing of surfaces and . Not to be used for aggressive liquids or degreasers. In these cases use the SprayMaster (550-110).
For more info, read the ad-page.

Price per unit

SOTT® Pressure Sprayer - HOZELOCK - 7 L SOTT

550-4007

Large pressure sprayer (7 l) with a 5 litre liquid capacity. The large reservoir is easily pressurized, and the long hose and special trigger allow you to spray large surfaces prior to applying window . In other words: you can simply carry on with the job in hand without having to walk back and forth to the tap. The wrist cramp that often results from holding the trigger of ordinary sprayer bottles is a thing of the past as well.

The spray head (A) can be set for the amount of spray mist needed, and the pressure can be adjusted by A B turning a button (B) next to the handle.

Price per unit

Water Gun 1 L

550-WG

- Is not affected by chemicals, degreasers, cleaners, adhesive removers, acids or aggressive liquids!

You've never seen a sprayer like this! The Water Gun releases a powerful mist instead of just beads of moisture. With a range of up to 3 metres! The Water Gun has an enormous spread of spray and covers the entire surface with a 'cloud'. This mist is much finer than the beads of moisture normally associated with other sprayers. The turbulent spraying action not only ensures that the surface is more efficiently sprayed, but the resulting mist also 'pulls' any dust that happens to be swirling around out of the ambient air.

Do not hold the Water Gun upside down; the trigger may leak.

IMPORTANT: The Water Gun is not long-lasting resistant to screen-print ink cleaners and Right-Off adhesive remover (600-Z0415). After several weeks, the trigger may start to leak.

One of the biggest advantages of the Water Gun is the turbulent mist that it creates. This not only achieves a greater range of spray, but also removes dust particles from the atmosphere.

The remaining liquid content is displayed on the side of the bottle.

750 ml

The sprayer of the Water Gun is especially developed to supply a high yield of spray per pump action. The Spray Master is also resistant to aggressive substances.

Price per unit

THE ULTIMATE HIGH PRESSURE SPRAYER IS HERE

SOAK'EM ALL

- 12 UNIQUE FEATURES
- 8.3m REINFORCED HOSE
- MADE IN EUROPE

- A must-have for any installer who wants to work quickly and efficiently

The SOTT WATERBOMB is the ULTIMATE high-pressure sprayer and is for every window and PPF installer. No more messing around with small pressure sprayers that waste time needing to be re-inflated all the time.

The WATERBOMB can be pumped up to 6 bar with a hand pump or with a compressor giving you perfect pressure to spray the moisture on to your or surface for the whole of your working day.

The barometer indicates how much pressure you have left in your tank. The inner casing is made of coated steel which will not rust and is not sensitive to chemicals and acids. The SOAK'EM trigger is compact and easy to handle which makes it easy to use in small spaces. The special ultra-flexible hose is reinforced on the inside so that kinking, flattening or being run over is not a problem.

10 L
6 Bar

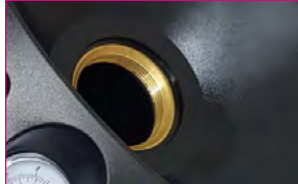

Storage compartment

Special storage compartment for small loose parts.

Extra large filling opening

Quick filling is easy with the large filling opening.

Heavy duty pump

Very strong brass pump with heavy duty metal handle.

2 adjustable straps

The two adjustable straps give you the option of carrying the tank on your back.

Compressor connection

Awesome! Pump up in the morning and all day sufficient pressure!

SOAK 'EM nozzle

The SOAK'EM trigger made of durable plastic. The pressure can be regulated via the nozzle. The trigger is also lockable.

Integrated pressure gauge

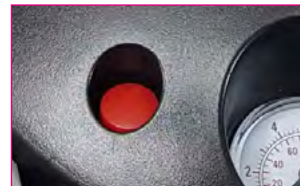

Quickly and easily read the tank pressure on the built-in pressure gauge.

Rotatable connection

Unique: the connection between the nozzle and hose can be rotated without the hose rotating.

Blow-off/safety valve

Just press the button and all pressure is off the tank.

Flexible heavy-duty hose

This flexible soft hose of no less than 8,3 m, is internally reinforced and can withstand a pressure of 15 bar.

Large foot + extra stability

The large foot stand ensures that the Water Bomb does not easily fall over during use.

Bottom connection

Because the hose connection is at the bottom, no residual liquid remains in the tank and again, it will not easily fall over.

- 10 L tank
- Manual inflation
- With pressure gauge
- 5 m spiral hose

The SteelMaster high-pressure sprayer is the little brother of the SOTT WaterBomb high-pressure sprayer (550-WB10). This high-pressure sprayer is easy to pump up to 6 bar with the handle. The built-in pressure meter shows how much pressure the tank contains. With the red button, you can vent the tank at once. The trigger has a screw-on brass nozzle.

Quick inflation with the handle

Large funnel-shaped filling opening

Plastic trigger

Plastic connections

Strong spiral hose

Pressure gauge

STEELMASTER put the pressure on

QUICK TIPS

SOTT WaterBomb components are non-interchangeable with this version.

Price per unit

- No more unsightly curled up pieces of tape

It's always been a problem: securing your rolls of material after use. Usually they are just taped up, but this often means that when the tape is removed, the material gets damaged. Not anymore!

Just use the Speed Clip.

This clip is made from a soft flexible plastic with a special finger recess allowing you to simply slide it along the roll without damaging the material. The clip then closes securely around the roll, holding the roll together.

Keep your ROLLS TIDY and in an ORDERLY fashion

Eliminates the chaos of unsightly taping

The Speed Clip ensures order and a clear view of your stock. It can be used on all types of material.

When the clip is removed, the material remains totally undamaged, but the Speed Clip does much more. Here are a few examples.

Handy finger grip

Flexible and self-closing

Rounded ends

Automatic spacing

Leaves no impression on the material

Suitable for window frames

Can be used on thick rolls

Ideal for laminates

Space for logo or company name

QUICK TIPS

After intensive use Speed Clips may develop some "play". No problem. Just place the Speed Clip in some hot water, and after a short time it will return to its original shape.

Price per unit

Right-Off Adhesif remover Goes GREEN!

FOR MORE THAN 20 YEARS SOTT'S RIGHT-OFF HAS BEEN THE ULTIMATE ADHESIVE IN EUROPE. CAN WE TOP THAT? YES, WE CAN!

Which is why we are introducing Right-Off 2.0, a new version that removes adhesive, glue and grease even more efficiently than version 1. It's easier and faster than before. It even removes the newest types of adhesives used by vinyl manufactures. And - maybe most importantly - it is completely environmentfriendly!

Simply spray it on, let it do its magic and scrape the goo from the undamaged surface.

Right-Off 2.0 removes more types of adhesive than the old version. Even specially primecoated adhesive systems are no match for Right-Off 2.0

Industrial Degreaser - Silicone Cleaner **SOTT**

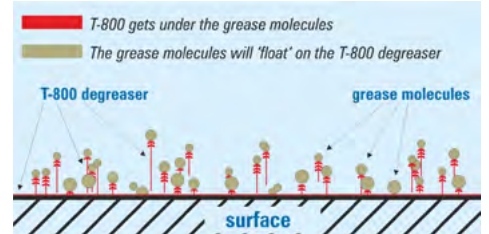

*optimal
removal of
SILICONE, OIL,
GREASE, etc.*

- Harmless for car paints
- Removes silicone, grease, tar, oil, adhesive, paraffin and car importer's wax

A unique balanced product that was especially commissioned and developed some 20 years ago for use in the metal fabrication, automotive and advertising industries. Used extensively in the metal fabrication industry for degreasing prior to chroming or galvanizing. SO THIS IS A REAL DEGREASER!

T-800 Removes underbody coating, car importer's wax, paraffin, grease, silicone, etc. from all surfaces. It will even degrease through water. So having to dry a car before degreasing following a shower of rain is a thing of the past. Just apply with a cloth, wait a few minutes, and then just wipe over with a dry cotton cloth. T-800 needs to be removed with a cloth because it is somewhat slower than the volatile thinners. There's a good reason for this; for it to make grease molecules 'float' it has to first get under the molecules. So when the surface is wiped with a dry cloth, the end result is a perfectly degreased surface.

*Suitable for car paints, metal, aluminium, Beauty Board, etc.
Not suitable for use on rigid foam, polystyrene, etc.*

Every colour is accompanied by a RAL number, giving you all the information you need to make the correct colour choice.

QUICK TIPS

For installing PPF, we recommend a 2-stage cleaning system. Step 1 is SOTT SurfaceCleaner 600-SC02. Step 2 is Industrial Degreaser 600-T800.

Silicon - Wax Remover

600-T900

- The best solution for removing stubborn wax

Durable surfaces such as car paint are often treated with a protective layer. The most conventional way to do this is to use a silicone-based wax. Since silicone has a repellent effect, this is ideal to prevent dirt. However, self-adhesive materials such as stickers, strips and wrap s will also no longer be able to adhere.

To be able to do this, the wax must be removed. SOTT 600-T900 Industrial Silicon & Wax Remover ensures that the wax becomes soft and dissolves, so that it can then be removed with a soft cloth.

*Perfect
CLEANING
PREP for the
EDGES before
installing
PPF*

How to use:

1. Wash the vehicle or substrate thoroughly so that all the (street) dirt is gone.
2. Make sure the surface to be treated is dry.
3. Apply SOTT 600-T900 Silicone & Wax Remover with the SOTT 300-040 3-layer cleaning paper. This is how you do it: make a wad of paper in your hand and pour SOTT 600-T900 Silicone & Wax Remover on the cleaning paper.
4. Now polish the treatment surface thoroughly and with circular overlapping movements with your cloth. Do this thoroughly and let it soak in for a few minutes.
5. It is possible that the surface will show a white haze. This is normal. This means that the wax becomes soft and begins to dissolve.
6. Now use the SOTT 300-021 UltraClean cloth, also wet it with SOTT 600-T900 Silicone & Wax Remover and polish the surface in circular movements.
7. If the white haze (if visible) disappears during brushing with 600-T900, then the silicone and/or wax has disappeared.
8. Always polish again with a new dry cloth 300-021 or cotton/microfiber cloth.
9. Allow the surface to wash out for 10-20 minutes before you start foil mounting.

QUICK TIPS

Please read the instructions carefully before use.

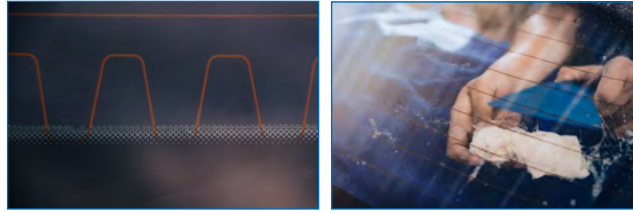

T-900 is the perfect product to remove all types of auto wax, often used on tuning- or high-end cars.

Price per unit

- Removes glue from windows with two fingers in your nose
- Does not affect substrates, rubbers, rebates and interior parts
- Biodegradable

A worldwide headache cause is the removal of solar window . And we mean especially the adhesive layer. Since the adhesive applied to such polyester s is different from conventional PVC s, it often sticks hard to glass. The itself comes off the adhesive, and so the adhesive remains on the glass. On car windshields it is then completely invisible nestled into the grids, and on flat windows you have huge surfaces to strip of the hard adhesive layer. Very tedious work.

Removing adhesive from window is often a difficult job. Aggressive liquids and sharp metal scrapers are regularly used to get the glass completely clean again. From now on, that won't be necessary.

*The
30 second
adhesive
REMOVER
for WINDOW*

The SOTT Spray-N-Gone window adhesive remover is the solution for this. It simply and easily dissolves the adhesive within a few minutes. The adhesive softens and can be easily removed. Afterwards, SOTT Spray-N-Gone works as a perfect surface cleaner to leave the substrate completely 100 % clean. Does not affect anything. Completely harmless to the environment.

Instructions for use:

1. Spray the adhesive layer that remains when the window (tinting) is removed.
2. Let it soak in and use a plastic scraper or squeegee to scrape the adhesive together.
3. Use cleaning paper (300-040) to pick up the softened adhesive residue and wipe it off the surface. Repeat the procedure if necessary.
4. Then lightly spray the surface again and now clean it thoroughly with the SOTT UltraClean cloth (300-020) to leave a 100 % clean and degreased surface.

LIQUIDS PREPARATION

Adhesive Activator - 100 ml **SOTT**

600-AA1400-100

- Neutralises surfaces containing silicone
- Harmless to the substrate

Always a pain: that releases out of recesses and channels. This could be for a number of reasons, but one of the main causes is the actual car paint.

Water based car paint: the main cause of poor adhesion.

Modern car paints may contain silicon molecules. This is obviously going to cause reduced surface adhesion. This is not normally a problem on flat bodywork panels as neither the nor the adhesive layer are under much tension. However, this tension is present in the recesses, channels and awkward corners with plastic bumpers, for example. Optimal adhesion in these areas is of paramount importance.

We all know what will happen to the if there is not a 100% adhesion.

Due to the silicone content in modern car paint, the adhesion of can be far from optimal. under tension (especially in recesses) is bound to come loose and ultimately be returned for repair or renewal.

Adhesive Activator AA-1400 appears to be the only product that successfully solves the problem of the poor adhesion of to certain car paints. This industrial grade product is also used as a bonding agent for silicone sealants on a variety of surfaces, the sealing of exposed security edges on glass being a prime example. Available in cans of 100ml.

*Eliminate
RISKS
by Improving
ADHESION*

The risks involved with water-based car lacquers:

Due to the silicone content in modern car lacquers the adhesion of can be far from optimal. under tension (especially in recesses) is bound to come loose and ultimately be returned for repair or renewal.

Damaged at the edges

Poor adhesion of full-colour prints

Application:

1. Thoroughly clean and degrease the application surface.
2. Using a cloth, apply a small amount of 600-AA-1400 to the surface and wait for approx. 15-30 minutes (depending on humidity levels).
3. Then apply the dry to the primer and voilà, a much improved adhesion to the surface.
4. Finish by following the manufacturer's instructions.

QUICK TIPS

Bonding primer for water based car lacquers

LIQUIDS CLEANING

Glasscleaner **SOTT**

600-GC101

- For optimal cleaning and degreasing of glass to prepare it for the mounting of tinting
- With a fresh and pleasant odour; no lingering nasty smells
- Deep-cleans and dries fast without leaving stripes.

When large shop windows or windows in or on offices are to be covered with tinting or vinyl, good bonding is of the utmost importance. No glass is perfectly smooth - the small surface irregularities are going to get dirty. New glass often has paraffin wax on the surface. Our GlassCleaner cleans and degreases glass thoroughly for installation of . Window manufacturers recommend Dirt-Off for cleaning windows before application. Contains a highly diluted 'acid' for completely removing grease, oil and dirt from glass without damaging its surface.

GlassCleaner draws the dirt out of the tiniest surface irregularities and lets it 'float', so it can be wiped away with a sponge, cloth or squeegee.

Harmless and with a pleasant odour

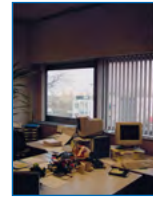

GlassCleaner is especially developed for regular use on large surfaces and lacks the typical offensive odour of alcohol- and ammonia-based cleaners. Also it is completely biologically degradable, non-corrosive and non-irritant. Good to know, next time you are spraying your cleaner around in a large office swarming with employees. There is no need to wear protective clothing or gloves.

Multifunctional!

GlassCleaner does more. Its formula makes it perfect as a general multifunctional cleaner for plastic boards, doors, tables tops, desks, shelves, etc

Instructions for use

Easy. Just spray the surface, if needed rub with a Scotchbrite Anti-Scratch scrub pas (300-025), then wipe away with a cloth or squeegee. Done!

Nothing more awkward than customers or staff complaining about the bad smell caused by cleaning the windows in a home or office. No more problems with the penetrating smell of ammonia or alcohol. GlassCleaner just smells fresh and does its job perfectly. And it can be used as interior cleaner!

Windows that reach down to the carpet or other valuable floor covering are popular and good-looking. But if your cleaner bleaches or tarnishes it, there will be trouble. GlassCleaner is your multi-functional cleaner that ONLY does what it SHOULD: it cleans the applied-on surface quickly, simply and without leaving any stripes.

DIRT-OFF

600-DO

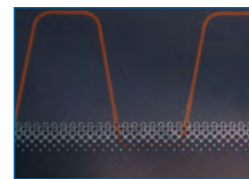

- 1 L
- As recommended by window manufacturers

Window manufacturers recommend Dirt-Off for cleaning windows before application. Contains a highly diluted 'acid' for completely removing grease, oil and dirt from glass without damaging its surface.

Dirt-Off is also ideal for use as a bonding aid to improve adhesion to the dot matrix raster and the rear windscreen demister

The windows of second hand cars or cars that have been used for transporting a dog should be cleaned with Dirt-Off before applying window .

The dot matrix raster around the edge of windscreens often present adhesion problems. Dirt-Off cleans these small areas thoroughly, thus ensuring improved adhesion.

Surface Cleaner II SOTT

- Developed especially for professional installers of all type of s
- Cleans car paint, metal, plastic, glass, bisonyl, etc, etc.
- Biologically degradable

SOTT Surface Cleaner-II is the number one cleaner in the selfadhesive industry. It meets all of the demands of the installer; just spray Surface Cleaner-II on any surface.

It loosens the dirt and you just remove it with a dry cloth. Surface Cleaner works fast and dries during polishing. No stripes, lines or dirt getting spread around. Just grab the SOTT Surface Cleaner-II, spray, wipe with a dry cloth, job done!

This universal cleaner certainly lives up to its name: it can clean any surface, removing dirt, grease, adhesive residue, etc ready for application. This product has been developed in accordance with the latest European standards and legislation, and conforms to all current environmental requirements.

*The fast
CLEANER
for all
surfaces*

Paint, Plastic and Rubber

SurfaceCleaner-II is specially developed to, thoroughly and quickly, get a perfectly clean and grease-free surface on all types of vehicle substrates – paint, plastic and rubber. No whitening or burning of the clear coat. The mixture of special ingredients removes grease, grime, wax and adhesive residue at the molecular level.

Windows

Before you start installing window , etch glass or vinyl lettering, you want to make sure the surface is completely clean. You'll be amazed at how effective and fast SurfaceCleaner-II does its job! It seeps under grease and dirt molecules that results in an easy wipe off and it evaporates quickly.

Signshop Workhorse

Plastic sheets, advertising signs or banner material? No worries. The multi-talent product called SurfaceCleaner-II is designed to be suitable for all types of applications.

CLEANER for MATT and GLOSS car wrap

- The Number One cleaner for matt and gloss s

Car wrapping is really HOT at the moment, especially the matt colours. However, it won't have escaped the notice of car wrappers how much more difficult coloured matt s are to clean than coloured gloss. Why is this?

It's the dimples in the

Matt s are somewhat structured with minute 'dimples' that deflect light to give it the matt appearance. These dimples collect street grime that is difficult to remove with ordinary cleaners.

Road salt, exhaust vapour and brake dust

Normal street grime is nowhere near as stubborn as the road salt used during the winter, especially when it's combined with asphalt and rubber. Add to that the steam from hot engines and the underside of cars that spreads to the sills and spoilers. Not to mention the dust from disc brakes that escapes through the wheels and clings to side of the car. This is a common problem especially with sports and executive models. These models are much closer to the road and the dirt; they tend to be driven faster, so the brake shoes are subjected to more wear, etc.

What does Carwrap Cleaner actually do?

Carwrap Cleaner loosens the dirt between the dimples and 'suspends' it until it's removed from the surface. The supplied car wrap sponges absorb the dirt preventing it from returning to the dimples. Then just rinse with clean water - job done!

Fashionable light colours such as matt white, matt silver or matt grey are notoriously difficult to clean.

A winter of road salt, a rainy day, or simply brake dust or exhaust vapour all present problems.

The car wash, steam cleaners or ordinary cleaners only remove surface dirt, and they always leave a dark haze on the .

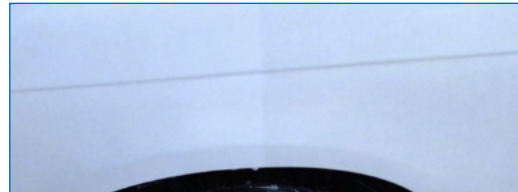

QUICK TIPS

Don't!: Never use thinners, degreasers or surface cleaners for removing dirt. This will increase the problem much more.

Just do!: A great seller to add to your range! Your car wrap clients can maintain the perfect look themselves if they purchase a Car Wrap Cleaner set.

After Car Wrap Cleaner

Conventional washing

This Opel Astra speaks volumes. After not being washed for 3 months, this car was cleaned using the conventional method. Only the surface dirt was removed. At first sight, it looks fine. Only when the left hand side has been cleaned with Car Wrap Cleaner is the difference suddenly apparent.

This Astra speaks volumes. After not being washed for 3 months, this car was cleaned using the conventional method. Only the surface dirt was removed. At first sight, it looks fine.

LIQUIDS PROTECTION

Solar Varnish - Heat Protection Coating 5 L

600-SV5

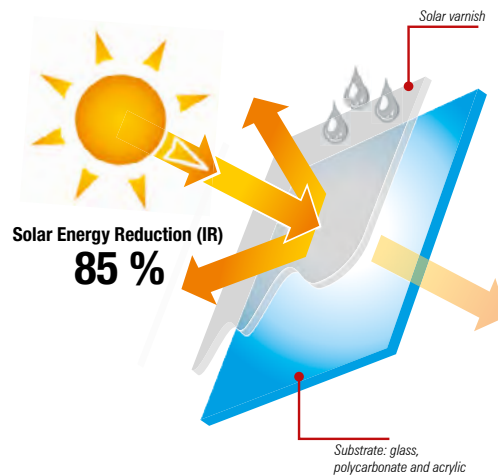

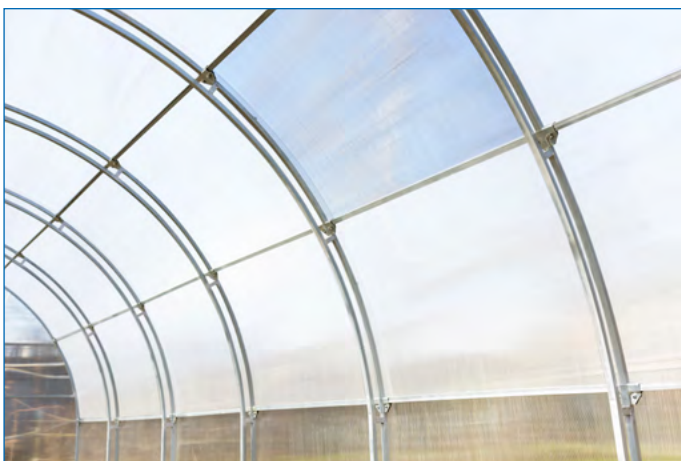

- Blocks up to 85 % of the sun's heat (IR)
- 5 L can

Solar Varnish is an alkyd resin-based translucent white heat resistant coating that can be simply applied to glass, polycarbonate and acrylic. This coating blocks as much as 85 % of the sun's heat. Ideal for skylights in factory buildings etc. Solar Varnish contains reflective particles that reflect both UV and infrared light. In addition, the absorption is low, so there will be little radiant heat. The coating is translucent matte, so it is not transparent. The result after application is a milky white, translucent layer. The best installation temperature (environment) is 10°-15°. Do not apply during rainy, foggy or wet weather. Lifetime 8 years (horizontal: 3-4 years).

Technical information:

Visible light transmission: 25 %
 Solar energy protection: up to 85 %
 UV protection: 90 %
 Glare reduction: 80 %
 Absorption: 10 %
 Consumption/capacity: 30m² (2 layers)

**SOLAR
REFLECTIVE
PAINT**

Instructions for use:

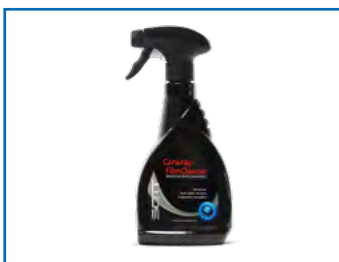

1. Substrate must be degreased and clean.
2. Can be applied by spray (for best result), brush or roller. Apply 2 layers.
3. Dilute the first layer with 50 % white spirit.
4. After 2 hours, the second layer (undiluted) can be applied. More information is enclosed in the package.

Price per unit

Window Polish

SOTT

600-GP346

- Gives the a protective sheen
- Offers an extra protective layer between the and the window reveals.
- For interior use only

After the application of window , the top layer often displays stripes and matt areas. These are just harmless traces of lime from the application fluid or simply small areas of dirt left by the squeegee. After a while, the on wind-up windows may start to get scratched or scuffed by the dirt in the seals and felt in the window rebates. This can be fixed.

-Polish brings back the shine and leaves the sparkling, as well as giving it a dirt-repellent protective layer. Window in cars Ideal for use on the window on wind-up windows, as the smooth protective layer allows the to run more smoothly between the seals and the felt in the window rebates. This will prevent scratches. Window in buildings -Polish gives large windows an impressive sheen as well as a dirt repellent layer. Not only that, after the has been polished it has an incredibly 'clean and tidy' appearance - great for customer satisfaction!

QUICK TIPS

A great seller to add to your range !
 Your customer can maintain that perfect look of the tinted glass themselves if they purchase a bottle of 600-GP346 Window Polish.

- Easier positioning and squeegeeing
- Also useable as slip agent for ppf

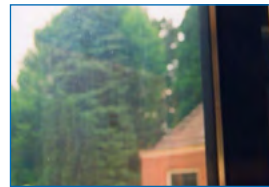

-On is the window tinter's friend and ppf's installers compaignion. It has unique properties not found in any other slip agents. It still has the edge on all other products on the market.

A colourless jelly-like concentrate for dilution in water. Just add a little to water, give it a quick shake and it's ready to use.

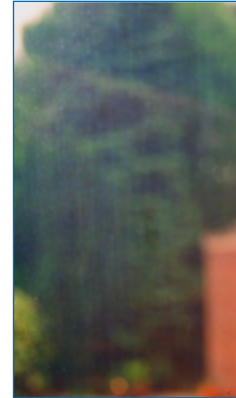

-On evaporates faster, and has a glutinous property that increases the viscosity of the solution. When it's sprayed on to glass, it stands firm unlike the soap and water solution that just cascades back down the glass.

You will notice immediately how much easier it is to slide the . The solution between the glass and the is softer and thicker which makes squeegeeing a lot easier.

White stripes and moisture build-up between the and the glass during drying is also reduced (common with safety) - a big plus! Adhesion is vastly improved.

A white haze or a collection of minuscule air bubbles is caused either by poor execution or by the reaction between the moisture and the adhesive layer of the . -ON almost eliminates the chance of white haze.

Slide-On™ Mounting Lubricant For Windows - 500 ml

SOTT **NEW**

600-F02

THIS EUROPEAN VERSION IS SIMILAR TO THE FAMOUS ON, BUT HAS MORE ADVANTAGES

*The new standard
in the window industry*

Improves and works faster than other concentrates.

Slide-On is the new standard!

The colourless gel mixes with water and increases its viscosity so that it spreads nicely over glass during spraying. A small layer with sliding properties is literally sprayed onto the glass. This allows window to slide and position easily. But there is another reason why TM is interesting. It slides on foams like soap, but disappears very quickly! And it should, because foam contains air, which is exactly what we don't want under the . When the soap property disappears after positioning and racking the , the adhesive layer does its job and starts the adhesion. No hazardous substance. Biodegradable

Instructions for use:

- Add 6-10 ml Slide-On™ to 1 liter of water. Shake and ready to use.
- Dosage amount depends on the ambient temperature. You can increase or decrease dosage as required.
- Always make sure spray tools are clean and clean any filters in the nozzle before starting..

How to dose.

- The bottle contains a small dosing chamber.
- This contains a measuring dosage in ml.
- Unscrew the cap of the dosing chamber. Now squeeze the bottle and through the small tube on the side, the concentrate will move up and fill the dosing chamber.
- Gently squeeze until the desired amount of concentrate has reached your targeted measure. Now you can pour the concentrate out of the dosing chamber without any problems.

*Window
and PPF
application

Price per unit

This product works better and faster than other concentrates, ensuring a dust-free area. It acts as an antistatic, cleaning, descaling, degreasing, disinfecting, and sanitising cleaner for glass surfaces, mirrors, and stainless steel, ensuring a long-lasting shine.

Directions for use:

- Spray the undiluted product onto the surface to be cleaned.
- Leave on for a few seconds.
- Wipe with a clean cloth or squeegee suitable for the surface.

Relevant identified uses:

- Cleans, descales and degreases glass and stainless steel surfaces (windows, showcases, refrigerated display cases, stainless steel worktops, etc).
- Removes dust, dirt and fingerprints without leaving residue.
- Suitable for all smooth surfaces.

essential for E-FILM installation

Safety instructions:

- Do not spray on hot surfaces or in flames
- Do not mix with detergents or acids
- Avoid direct contact with eyes
- Preferably use at temperatures between 5°C and 28°C
- Store at temperatures not exceeding 28°C
- Protect from freezing
- Only store in the original container
- Keep tightly closed

Perfect for use with:

300-040

Composition:

- Ultrapure water
- Caprylyl Capryl Glucoside
- Cetrinonium Chloride 29
- co²-mango extract
- co²-coco extracts
- Ligitint Royal HF

Benefits:

- Alcohol free
- PH neutral
- Non-aggressive to the epidermis
- Biodegradable
- Non-inflammatory
- Organic surfactant
- Solvent free

Right-On Spray - Application Liquid

- **Faster than soap and water**
- **Easy to use**
- **3 minutes to position and make adjustments before adhesion starts**

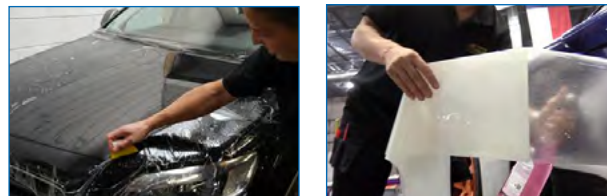

The perfect solution for fast and effortless application of self adhesive s without air bubbles and wrinkling. Right-On allows the to be repositioned after initial application.

It offers all the advantages of soap and water, but it works faster. Spray the substrate and adhesive layer of the , apply the and slide it effortlessly in to position. The begins to bond after just 3 minutes and you can even start working it into channels immediately.

Right-On Spray will not affect the adhesive layer. Suitable for use on all types of wet application .

The one and only 3 minute APPLICATION LIQUID

Quick and easy installing of PPF

Right-On Spray is suitable and effective solution for PPF. It gives the installer the freedom to position and readjust which allows them to install with confidence. And because of the special ingredients in Right-On Spray, the final adhesion level is even improved when compared to other liquid carriers.

Oversaturated or Aggressive Full Print Wraps

Printed sometimes feels different, has harder tack and can be tough to install (especially when the panels are big). This is often caused by s that haven't properly outgassed or are oversaturated. Heat and humidity can also cause full print wraps to grip overly hard. Right-On Spray was made for just these situations. Simply spray, position, squeegee and you're done!

Hot garage? Sticky ? No Problem

On warm days, even the friendliest wrap can get aggressive which can cause install times to shoot up as well as frustration levels. Using a thin mist of Right-On Spray on both the surface and adhesive can help that panel slide and glide. The unique blend of Right-On Spray won't compromise the adhesive so it's safe for all brands.

This product has been developed in accordance with the latest European standards and legislation, and conforms to all current environmental requirements.

PROMOTIONAL TOOLS

Today's customers often know exactly what they want. But how do you convince your customer that you can offer them the best? That you have exactly what they need? Our support materials will help you do just that. For each specific topic, we have something that can help you with your sales or your presentation.

PROMOTIONAL MATERIALS to convince your customer

Window Demo Box with 250V IR lamp

750-WFDB

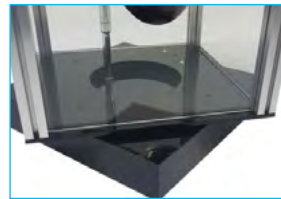

- Seeing and feeling = believing! Let the customer experience the result himself
- Turnable box with four glass panels

The Window DEMO BOX is intended to convince your customer that window really works.

The box consists of a base with a turnable unit on top with four glass panels that can be tinted with window as desired. Press the button and the 250 watt IR lamp turns on. The different types of window on the glass panels allow your customer to clearly feel the difference in heat protection.

Our advice: leave one glass panel free of window, so that the difference with and without can be experienced very clearly.

220 V DEVICE EUROPEAN POWER CORD

QUICK TIPS

The DEMO BOX is made of high-gloss acrylic. The glass panels can easily be changed by taking off the lid. The lamp is operated with a switch, which switches off automatically after 2 minutes.

Price per unit

Window Performance Box - Metal Case

750-WFP

- Seeing is believing!
- Convince your customer within 1 minute

The WINDOW PERFORMANCE BOX immediately shows the heat difference between two windows and the temperature difference in both compartments. The ultra-strong metal case contains two compartments with a 150 W infrared lamp inside. Each compartment contains a sensitive temperature gauge and fan at the bottom. Between the lamp and the temperature gauge a glass plate with window is placed*. Press the button and the lamps turn on. The temperature rises in both compartments, which can be read on the lower digital displays. The upper digital displays indicate the temperature difference between the ambient temperature with- and without the placed glass plate with window.

After 1 minute the unit switches itself off.

Digital display shows temp difference

Digital display shows compartment temp

UV Sentry Transmission Meter - Digital

750-WFUV

- Convince your customer with this meter
- Handy; operates on 9 v battery (included)
- Measures UV-A

The UV SENTRY is probably the simplest meter available to measure the amount of UV in the spectrum from 325 nm to 385 nm that passes through a transparent material. The meter measures transmission accurately to 0.1 %. The digital display is constantly updated with real-time measurements. Make an impact and convince your customer by illustrating the UV blocking properties of your product.

The meter can calculate the actual UV Transmission percentage of a given material. The UV SENTRY can be used to measure the UV characteristics of glass, coatings, laminates, or other materials. Use this meter to make convincing sales presentations. The UV SENTRY can effectively promote your UV-blocking products.

QUICK TIPS

The meter works best with adequate UV light. During a cloudy day, the meter may not be able to detect the sun's rays sufficiently.

Price per unit

Light Meter - In Lux

750-WFL

- Measuring range: 0.01 - 50,000 lux
- Comes in storage bag

This digital light meter is a very precise measuring instrument with which the light intensity in a certain environment can be measured. After the measurement, you know exactly what to do when, for example, window shades are applied to exterior windows and the incoming light is reduced.

This can be hugely important, because rooms used by people must comply with a certain amount of light (indicated in lux), to perform optimally or live healthily. For example, the light in a waiting room should average 250 lux. For offices and laboratories 500 lux. For workshops, 750 lux. And for technical drawing, precision work and color assessment 7000 lux. The measurement is made via a photo element and is then displayed on the screen.

QUICK TIPS

Batteries included.

Price per unit

Solar Transmission & Power Meter

750-WFBTU

- Use this meter to evaluate solar performance.

It provides excellent resolution, reading low light conditions more accurately than competitors, with no need for adjustments. The easy to read digital display toggles between power and transmission percentage mode. It's small, portable, and convenient to take out in the field. Can be switched to read in metric units.

QUICK TIPS

Powered by a 9-volt alkaline battery (included).

Price per unit

- 3 Devices in one case
- No more guessing and doubting

What kind of glass should you quote with? Is it single glass? Double? Triple? Is there a Low-E coating perhaps? How large is the distance between the multiple panes of glass? All important if you want to avoid problems like thermal breakage or wrong choice.

As of now, you have a solution.

This professional kit contains all the gauges you need to know what type of glass you are dealing with. Often, your customer himself does not know what kind of glass he has in his building. Now you can check yourself and make your decision. Indispensable for every professional window installer.

THIS IS WHAT YOU GET:

Toughened glass indicator

Several types of window can often be mounted on tempered glass. But then you need to know if that is really the case. This indicator shows you exactly that. Vertical lines appear in the window when you are dealing with tempered glass. 2 lines when it is single glass tempered and 4 lines when you are dealing with double glass tempered.

Glass thickness and glass distance meter

This gauge shows exactly how thick the glass is, even when it is made up of several sheets of glass. It also measures the air gap between the glass panes. The following glazing's can be identified by this meter: where it is.

Low-E coating detector

Some types of glass have an invisible insulating and energy efficient factory coating. But which side is it on? Inside, outside or in between? This meter detects the coating and indicates where it is.

- SINGLE GLAZED
- DOUBLE GLAZED
- COATED DOUBLE-GLAZED (LOW-E ETC.)
- TRIPLE GLAZED
- LAMINATED SAFETY GLASS
- LAMINATED FIREPROOF GLASS (ALSO MULTIPLE LAYERS)

Price per unit

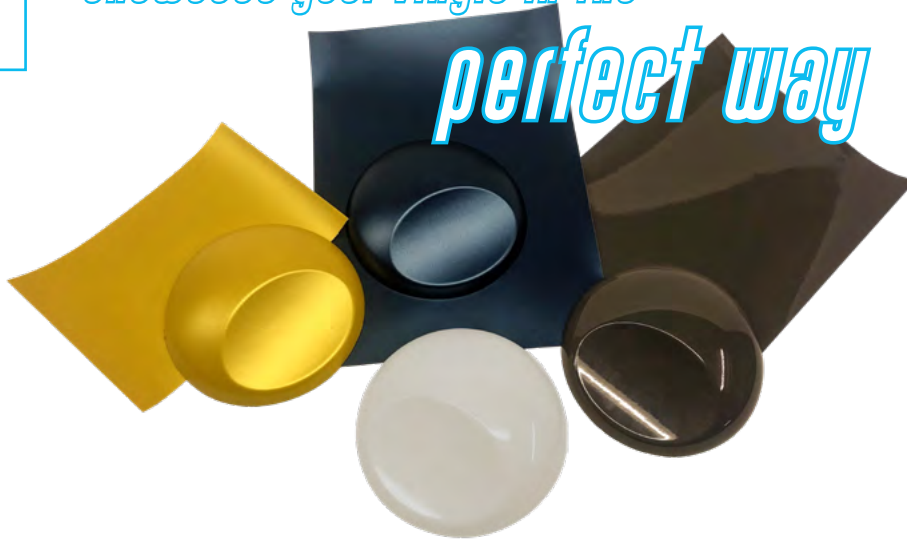

- Hard plastic
- 14 cm round and 3 cm high

The hard plastic SHAPE has everything to showcase a colour at its best. The round shape is convex, concave and also contains sharp kinks, so that the applied colour shows to full advantage in every light and at every angle of vision.

showcase your vinyls in the perfect way

How can you demo your color selection in a beautiful and perfect way ? Display swatches of vinyl ? Only use a color chart ?

These white, plastic car shapes are hollow, lightweight and designed specifically for vinyl wrapping so their colors are shown in the best way possible. Your customer will get a better impression of how the vinyl looks on a curved shape instead of a small swatch out of a color collection.

Price per unit

- A must for every architect, designer and sign maker.
- Including 17 metallic colours and 6 fluorescent colours.

The official colour fan consisting of 210 standard RAL colours. All colour definitions of paint, lacquers and coatings as used in the construction industry available in one fan.

RAL COLOUR FAN

RAL COLOURS ARE THE COLOUR DEFINITIONS OF PAINT, LACQUERS AND COATINGS AND ARE USED AS THE INDUSTRY STANDARD IN ARCHITECTURE AND CONSTRUCTION THROUGHOUT EUROPE.

STANLEY® Max Tape Rule - Professional **STANLEY**

A valuable addition to your tool kit and a sheer relief: finally you will be able to easily measure height without the blade bending due to wind or stand-out. You will be able to measure the length of an advertising board, neon sign or trailer, knowing the blade will stay straight and won't fall off the edge. These STANLEY tape rules are exceptionally sturdy, finally meeting the every-day needs of window installers and signmakers.

STANLEY® Leverlock Tape Ruler - 3 m **STANLEY**

350-RM3

This professional-standard STANLEY tape rule is perfect for any type of work, thanks to its handy size and the fact that the blade, once extended, is automatically locked.

- Shockproof case
- Blade does not automatically recoil when extended
- Simply press the button and the blade retracts
- Polymer coated tape
- Bi-material case made of soft elastomer
- Tru-Zero hook allows for exact inside and outside measurements
- Belt clip
- Accuracy: class II

Price per unit

The Yellow - 5® Cutting Ruler **SOTT**

YELLOW-5

Anti-slip cutting ruler, indispensable for signmakers, window tint installers and interior installers, that need to cut straight lines without the cutting ruler sliding all over the place.

A unique solid aluminium cutting ruler with all of the advantages that you could possibly wish for: strong, stable, straight, but above all safe. This allows you to make long cuts with ease, without the fear of the knife 'jumping' and running across your fingers. The workshop becomes safer and production is increased. Large sheets of and thick, rigid materials can now be cut with ease.

The Factotum - II **SOTT**

150-095

- The solution for small corners, holes, seams and cracks
- Unbreakable material

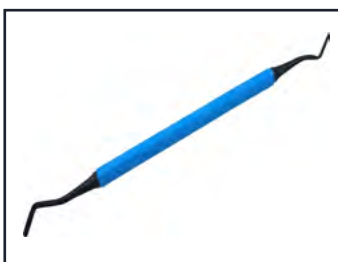

Every mechanic knows it: mounting self-adhesive in places that are hard to reach. The Factotum-II is a handy mini oval with two usable sides. It guides every in the smallest corner or kink, without destroying the while pressing. The smooth rounded corners give you the perfect opportunity to guide the to where you want it.

Medium stiff and unbreakable.

Price per unit

The Finisher **SOTT**

150-101

- Press down in the smallest little areas
- 2 Different spoon positions
- Coated metal spoons

A must-have for every installer. This pen-style tool has two smooth metal spoons, each at a different angle. The spoons are flat to allow for to be expertly pressed down in otherwise unreachable places. Think of corners of car hoods, between rear lights and headlights, around grilles and door handles.

Price per unit

- Set of 5 pieces
- Ideal for pressing and guiding in trenches
- Prevents cutting your fingers
- Cut resistance level 5

An alternative to a complete wrap glove.

Wrapping gloves are now fully established. But why should the WHOLE hand be covered with fabric if you often only use your fingers to push the into the channels and kinks? Also: using a glove to grip the 's adhesive layer is not always wise; fibers and dust can stick to the adhesive layer from the glove. And we don't want that.

Simply place the Little Willies on just a few fingers. Use these fingers to press on the and the other to grip the and adhesive layer. Pretty as it can be. Comes in one size; elastic fabric.

Price for 5 pieces

- Meets the ASTM/ANSI test: Cut level 5
- Smooth and tightly woven
- Set of 1 pair

Every installer knows the problem: accidentally cutting your hand or fingers. When large sheets of , cardboard or plastic panels have to be cut, there is a risk of accidentally cutting your fingers. This can be avoided using the ANTI-CUT Glove. This glove is woven with a smooth fibre that prevents sharp objects from passing through it.

Price per unit

Seamless application glove, made of elastic material. The white material helps you to check whether the surface and/ or the vinyl is clean. Because of the perfect fit it gives you the necessary feeling that you need during your application work, especially when you deal with curved surfaces on cars. The glove is made of dust free material, so even touching the adhesive of the vinyl will not cause any residue to be left behind.

QUICK TIPS

Available in 3 sizes:

Medium	400-252	Price per set
Large	400-253	Price per set
X-Large	400-254	Price per set

Have you ever had small creases pop up at the corners of a wrap? Or small overlaps that lose their adhesion? This practical tool is intended for releasing the tension off installed edges around corners. The CornerSealer allows you to melt small creases or curly edges and close or flatten them.

QUICK TIPS

ABS housing Pocket-size Works on 2 alkaline batteries (not included)

HOW TO USE:

1. Make sure is clean and degreased
2. Activate the device to preheat the flat head. This takes about 10-15 seconds (preheating time increases with deteriorating batteries). **ATTENTION! Head can get hot!**
3. Avoid skin contact to prevent injury
4. Place the flat head against the area and push down firmly
5. Avoid overheating! 1-3 seconds of pressing is usually sufficient

Price per unit

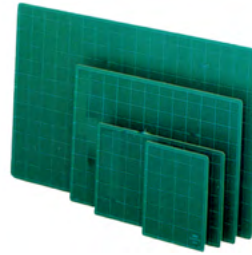

Cutting Mat - Triple Layer

250 - SERIES

- 3 mm (120 mil) thick double layer calibrated cutting mat
- Available in black, green and transparent

High quality cutting mat which closes after every cut, preventing your knife from following previous cuts. These mats are triple layer enabling both sides to be used. So they'll last twice as long!

OLFA® Cutting Mat Multi - Purpose Self - Healing Craft **OLFA**

250-CM SERIES

- One side shows cm, other side shows inches

CM series multi-purpose self-healing cutting mats are 2 mm thick and specially designed for use with OLFA standard duty cutters, heavy-duty cutters, art knives, rotary cutters and specialty cutters. Double-sided with green base color and white grid lines with a metric grid on one side and an inch grid on the other. Grid lines are designed for easy measuring and for accurate cutting of straight lines and precise angles. Self-healing, an OLFA original technology refers to the ability of the surface to return to its original shape after being cut and are ideal for general quilt cutting. A three-layer structure and soft cutting surface realize smooth cutting even after many years of use. OLFA CM mats protect your work area and greatly extend the life of your blades.

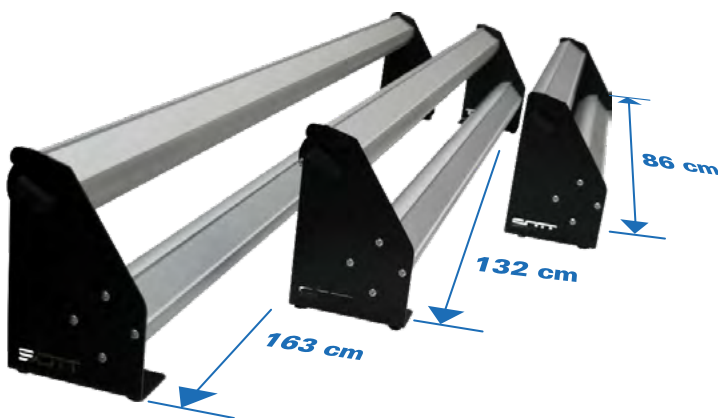

QUICK TIPS

WARNING!

- Keep the mats away from sunlight and heat
- Mats must be stored flat
- Not suitable for use with steam irons
- Not suitable for use with OLFA MC-45 and MC-45/DX

Surface Cleaner II **SOTT**

600-SC02FLES

- Developed especially for professional installers of all type of s
- Cleans car paint, metal, plastic, glass, bisonyl, etc.
- Biodegradable

SOTT Surface Cleaner II is the number one cleaner in the self-adhesive industry. It meets all of the demands of the installer; just spray Surface Cleaner II on any surface.

It loosens the dirt and can be removed with a dry cloth. Surface Cleaner works fast and dries during polishing. No stripes, lines or dirt getting spread around. Just grab the SOTT Surface Cleaner II, spray, wipe with a dry cloth, job done!

This universal cleaner certainly lives up to its name: it can clean any surface, removing dirt, grease, adhesive residue. This product has been developed in accordance with the latest European standards and legislation, and conforms to all current environmental requirements.

Price per unit

Industrial Degreaser - Silicone Cleaner **SOTT**

600-T800FLES

- Harmless for car paints
- Removes silicone, grease, tar, oil, adhesive, paraffin and car importer's wax

A unique balanced product that was especially commissioned and developed over 20 years ago for use in the metal fabrication, automotive and advertising industries. Used extensively in the metal fabrication industry for degreasing prior to chroming or galvanizing. SO THIS IS A REAL DEGREASER!

Price per unit

Silicon - Wax Remover

600-T900

- The best solution for removing stubborn wax

Durable surfaces such as car paint are often treated with a protective layer. The most conventional way to do this is to use a silicone-based wax. Since silicone has a repellent effect, this is ideal to prevent dirt. However, self-adhesive materials such as stickers, strips and wrap s will also no longer be able to adhere.

To be able to do this, the wax must be removed. SOTT 600-T900 Industrial Silicon & Wax Remover ensures that the wax becomes soft and dissolves, so that it can then be removed with a soft cloth.

Price per unit

Roll Dispenser

500-050

- Indispensable in every workshop

Metal dispenser for rolls of triple layer polishing paper (300-040). This handy dispenser holds a roll of polishing paper and allows individual sheets to be torn off across a black perforated guide at the top. The dispenser can be folded for easy transportation.
